## Independent Auditors' Report

To Tahsin Industrial Corporation:

### Audit Opinion

Tahsin Industrial Corporation's Parent Company Only Balance Sheets as of December 31, 2025 and 2024, in addition to the Parent Company Only Statements of Comprehensive Income, Parent Company Only Statements of Changes in Equity, Parent Company Only Statements of Cash Flows, and Notes to the Parent Company Only Financial Statements (including the Summary of Significant Accounting Policies) from January 1 to December 31, 2025 and 2024, have been audited by the CPAs.

According to our opinion, the Parent Company Only Financial Statements mentioned above have been prepared in accordance with the "Regulations Governing the Preparation of Financial Reports by Securities Issuers" in all material aspects, and are considered to have reasonably expressed the parent company only financial conditions of Tahsin Industrial Corporation as of December 31, 2025 and 2024, as well as the parent company only financial performance and cash flows from January 1 to December 31, 2025 and 2024.

### Basis for Opinion

We conducted our audit in accordance with the Regulations Governing Financial Statement Audit and Attestation Engagements of Certified Public Accountants and auditing standards. Our responsibilities under those standards are further described in the section titled "Auditor's Responsibilities for the Audit of the Parent Company Only Financial Statements." We are independent from the Company pursuant to the Norm of Professional Ethics for Certified Public Accountant of the Republic of China, and we have fulfilled our other responsibilities in accordance with these requirements. We believe we have obtained sufficient and appropriate audit evidence to serve as a basis for our opinion.

### Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the Parent Company Only Financial Statements of Tahsin Industrial Corporation for the year ended December 31, 2025. Such matters have been dealt with in the course of auditing and compiling the parent company only financial statements and in the preparation of our audit opinion. As such, we do not respond to each key matter individually. The key audit matters for the parent company only financial statements of Tahsin Industrial Corporation for the year ended December 31, 2025 are as follows:

#### Revenue recognition

Please refer to Note 4 (17) of the Parent Company Only Financial Statements for accounting policies regarding revenue recognition; please see Note 5 (1) 3 of the Parent Company Only Financial Statements for critical accounting judgments, estimates, and assumptions regarding revenue recognition; please see Note 6 (20) of the Parent Company Only Financial Statement for disclosure of information related to income.

#### Key Audit Matters:

The operating revenue of Tahsin Industrial Corporation comes mainly from sale of products. Recognition of sales revenue is mainly to verify whether the control over goods is transferred to buyers and whether there are no non-performance obligations that may affect the acceptance of products, and also is the main indicator for investors and the management to assess the financial or business performance of the Company. As the accuracy of the amount and timing of revenue recognition has a great influence on the financial statements, we have thus included it as one of the key audit matters.

Audit procedures adopted:

Our audit procedures include (i) understanding and testing the effectiveness of internal control mechanisms adopted by the management on revenue recognition; (ii) sampling and reviewing records of sales revenue recognition (including shipping documents) over a certain period of time before the balance sheet date, and determining the appropriateness of recognition timing thereof; (iii) testing selected underlying transactions before and after the end of the reporting date to verify if they were recognized in the correct period; (iv) assessing whether the risks and rewards of goods, of which the revenue had been recognized, have been transferred; and (v) performing a trend analysis on major buyers and revenues by product to determine if material irregularities exist.

#### Cash and cash equivalents

Please refer to Note 4 (5) of the parent company only financial statements for details of the accounting policies for cash and cash equivalents; please refer to Note 6 (1) of the parent company only financial statements for details of the accounting items for cash and cash equivalents and time deposits with an original maturity of more than three months.

#### Key Audit Matters:

As of December 31, 2025, the carrying amount of cash and cash equivalents and time deposits with initial term maturity date over three months (shown under other financial assets – current) held by Tahsin Industrial Corporation amounted to NTD2,290,775 thousand, accounting for approximately 22% of the total assets and the amounts are significant to the overall parent company only financial statements. We identified these as one of the key audit items due to the inherent risk of cash and cash equivalents and time deposits with initial term maturity date of over three months.

#### Audit procedures adopted:

1. Evaluate and test the effectiveness of the design and implementation of the internal control system for cash and cash equivalents and time deposits with initial terms of over three months.
2. Conduct significant transactions test and verification procedures for frequent bank accounts, including understanding the purpose of the bank account and reviewing relevant transaction vouchers to confirm the reasonableness of the receipt and payment of huge bank deposits.
3. Conduct an inventory verification process on cash and term deposits, including checking whether term deposits have provided guarantees or pledged to confirm consistency with the disclosures in the financial statements.
4. Obtain a breakdown of the balances of cash and cash equivalents and time deposits with initial terms maturity date of over three months and check the bank statements and the related relevant transaction voucher to confirm their existence. In addition, check the amount on the correspondence response letter for all financial institutions and examine whether there are any restricted incidents, which have been properly disclosed.

#### Financial assets measured at fair value through other comprehensive income

Accounting policies related to financial assets measured at fair value through other comprehensive income are detailed in Note 4 (6) of the parent company only financial statements; significant accounting judgments, estimates, and assumptions regarding the classification and fair value measurement of financial assets are provided in Note 5 (1) and 5 (2) of the consolidated financial statements; explanations regarding the accounting items of financial assets measured at fair value through other comprehensive income are disclosed in Note 6 (3) and 6 (7) of the consolidated financial statements.

#### Key Audit Matters:

As of December 31, 2025, the carrying amount of financial assets measured at fair value through other comprehensive income held by Tahsin Industrial Corporation and subsidiaries amounted to NTD3,576,393 thousand, accounting for approximately 34% of the total assets. The amount is significant to the overall consolidated financial statements. Therefore, the auditor considers these items as one of the key audit matters.

#### Audit procedures adopted:

1. Evaluate and test the effectiveness of internal control systems design and execution related to investment operations, including whether transactions are appropriately approved.
2. Perform substantive audit procedures on financial assets measured at fair value through other comprehensive income, including verifying the accuracy of initial recognition and subsequent measurement amounts, cross-checking relevant documents, obtaining confirmations or verifying relevant documents to confirm whether collateral or pledges have been provided, ensuring consistency with financial reporting information disclosure.

## **Responsibilities of the Management and the Governance Unit for the Parent Company Only Financial Statements**

To ensure that the parent company only financial statements do not contain material misstatements caused by fraud or errors, the management is responsible for preparing prudent parent company only financial statements in accordance with the "Regulations Governing the Preparation of Financial Reports by Securities Issuers" and for preparing and maintaining necessary internal control procedures pertaining to the parent company only financial statements.

In preparing the parent company only financial statements, the management is responsible for assessing Tahsin Industrial Corporation's ability to continue as a going concern, disclosing, as applicable, matters related to the going concern and using the going concern basis of accounting unless the management either intends to liquidate Tahsin Industrial Corporation or to cease operations, or has no realistic alternative but to do so.

Those charged with governance (including the Audit Committee) are responsible for overseeing Tahsin Industrial Corporation's financial reporting process.

### **Auditor's Responsibilities for the Audit of the Parent Company Only Financial Statements**

Our objectives are to obtain reasonable assurance about whether the parent company only financial statements as a whole are free from material misstatements, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the auditing standards will always detect a material misstatement when it exists in the parent company only financial statements. There may still be material misstatements due to fraud or errors. If it could be reasonably anticipated that misstated amounts, individually or on aggregate, could have influenced the economic decisions made by the users of the parent company only financial statements, it will be deemed as material.

As part of an audit in accordance with the auditing standards, we exercise professional judgment and skepticism throughout the audit. We have also performed the following tasks:

1. Identify and evaluate the risk of material misstatements due to fraud or error in the parent company only financial statements; design and carry out appropriate countermeasures for the evaluated risk; and obtain sufficient and appropriate evidence as the basis for audit opinion. As fraud may involve collusion, forgery, deliberate omissions, false statements, or violations of internal controls, the risk of an undetected material misstatement due to fraud is greater than that due to errors.
2. Obtain an understanding of internal controls relevant to the audit in order to design audit procedures that are appropriate under the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal controls of Tahsin Industrial Corporation.
3. Assess the appropriateness of the accounting policies adopted by the management and the reasonableness of the accounting estimates and related disclosures has made.
4. Conclude on the appropriateness of the management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on Tahsin Industrial Corporation's ability to operate as a going concern. If we believe that there may be factors causing significant uncertainties, we are required to remind the users of the parent company only financial statements in our audit report of the relevant disclosures therein, or to amend our report if inappropriate disclosure was made. Our conclusions are based on information available at the date of the auditor's report. However, future events or circumstances may cause the Company to cease to continue as a going concern.
5. Evaluate the overall expression, structure and contents of the parent company only financial statements (including relevant Notes), and whether the parent company only financial statements fairly present relevant transactions and matters.
6. To obtain sufficient and appropriate audit evidence regarding the financial information of the components within Tah Shin Industrial Corp. to express an opinion on the parent company only financial statements. We are responsible for the direction, supervision, and review of the work performed, and are responsible for forming our audit opinion on Tah Shin Industrial Corp .

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine the key audit items of Tahsin Industrial Company's parent company only financial statements for the year ended December 31, 2025. Such matters have been explicitly stated in our audit report, unless laws or regulations prevent their disclosures, or, in extremely rare cases, we decide not to communicate such matters in our audit report in consideration that the reasonably anticipated adverse impacts of such communication would be greater than the public interest it would promote.

Chief Accountant: Chen, Ming-Je

**Tahsin Industrial Corporation**  
**Notes to Parent Company Only Financial Statements**  
**For the Years Ended December 31, 2025 and 2024**  
(Amount in Thousands of New Taiwan Dollars, Unless Specified Otherwise)

**(I.) Company History**

Tahsin Industrial Corporation ("The Company") was incorporated under the Company Act of Taiwan, Republic of China (R.O.C.) in 1958. The Company and its subsidiaries are primarily engaged in manufacturing and trading of a variety of plastic raincoats, nylon raincoats, overalls, wardrobes, nylon jackets, PP corrugated boards, TC garments, leather goods, handbags, file folders, plastic film, carrier bags and laminating machines, etc. The Company was approved by the Securities and Futures Bureau under the Financial Supervisory Commission (formerly the Securities and Futures Commission) for listing in 1992.

**(II.) Date and Procedures of Authorization for Issuance of the Financial Statements**

The parent company only financial statements have been approved and released by the Board of Directors on March 12, 2026.

**(III.) Application of Newly Issued, Revised, and Amended Standards and Interpretations**

- a. The impact of the International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) (hereinafter referred to as "IFRSs") endorsed and effected by the Financial Supervisory Commission (hereinafter referred to as the "FSC"): The following table summarizes the new, revised, amended standards and interpretations of IFRSs endorsed by the FSC and are applicable in Year 2025:

New/Revised/Amended Standards and Interpretations	Effective Date Issued by IASB
Amendments to IAS 21 "Lack of Exchangeability"	January 1, 2025

The amendments define exchangeability and provide application guidance on how an entity determines the spot exchange rate at the measurement date when a currency lacks exchangeability. Additionally, these amendments require an entity to provide more useful information in its financial statements when one currency cannot be exchanged into another.

The company has already evaluated that the regulations and explanations above make no significant effects on the company's financial situation and performance.

- b. Effects of IFRSs issued by IASB but not yet endorsed by FSC in the Year 2026: The following table summarizes the new, amended and revised standards in the IFRSs that have already been issued by the IASB but are yet to be endorsed by the FSC and related interpretations:

New/Revised/Amended Standards and Interpretations	Effective Date Issued by IASB
Amendment to IFRS 9 and IFRS 7, "Amendments to the Classification and Measurement of Financial Instruments"	January 1, 2026
Amendment to IFRS 9 and IFRS 7, "Contracts for Renewable Electricity"	January 1, 2026
IFRS 17 "Insurance Contracts"	January 1, 2023
Amendments to IFRS 17 "Insurance Contracts"	January 1, 2023
Amendment to IFRS 17, "Initial application of IFRS 17 and IFRS 9 - comparative information"	January 1, 2023
IFRS Annual Improvements—Volume 11	January 1, 2026

Except as described below, the above standards and interpretations have no significant impact on the Group's financial condition and financial performance based on the Group's assessment.

- 1) Amendment to IFRS 9 and IFRS 7, "Amendments to the Classification and Measurement of Financial Instruments" The amendments include the following:

- (a) The amendments clarify and provide further guidance on assessing whether financial assets meet the Solely Payments of Principal and Interest (SPPI) criteria. The scope includes contractual terms that could change the timing or amount of contractual cash flows based on a contingent event (e.g., interest rates linked to ESG targets), non-recourse features, and contractually linked instruments.
- (b) For instruments containing contractual terms that could change the timing or amount of contractual cash flows (for example, instruments with features linked to the achievement of environmental, social, and governance (ESG) targets), the following shall be disclosed: a qualitative description of the nature of the contingent events; quantitative information about the range of potential changes in contractual cash flows that could result from those contractual terms; and the total carrying amount of financial assets and the amortized cost of financial liabilities subject to such contractual terms.

- (c) Clarification of the recognition and derecognition dates for certain financial assets and liabilities. The amendments introduce that, when settling a financial liability (or part of it) using an electronic payment system with cash, an entity may derecognize the liability before settlement date if, and only if, the entity has initiated the payment instruction and:
    - A. the entity no longer has the ability to cancel, stop or reverse the payment instruction
    - B. the entity no longer has access to the cash for settlement due to the payment instruction; and
    - C. the settlement risk associated with the electronic payment system is insignificant.
  - (d) Updated disclosure requirements for equity instruments designated at fair value through other comprehensive income (FVTOCI) via the irrevocable election. Entities are now required to disclose fair value by class of equity instruments, rather than individually. In addition, entities must disclose: the amount of fair value gains or losses recognized in other comprehensive income during the reporting period; separately, the amounts related to investments that were disposed of during the period and those still held at the reporting date; and the cumulative gain or loss transferred to equity upon disposal.
- 2) Amendment to IFRS 9 and IFRS 7, “Contracts for Renewable Electricity”  
 These amendments clarify how contracts related to power generation that depends on uncontrollable natural factors (e.g., weather conditions) should be treated:
- (a) Clarification on the “own-use” exemption for contracts to purchase or sell renewable electricity:  
 When a contract obliges an entity to purchase and receive electricity upon generation, and the design and operation of the market require the entity to sell any unused electricity within a specified period, the entity must assess—based on reasonable and supportable information not exceeding 12 months—whether it is a net purchaser of electricity (i.e., purchases enough to offset its own sales in the same market). New disclosures required for such own-use contracts include:
    - A. risks arising from variability in the underlying volume of electricity and obligations to purchase during delivery intervals where electricity may be unusable;
    - B. unrecognized contractual commitments, including expected future cash flows for electricity purchases;
    - C. the impact of such contracts on the entity’s financial performance during the reporting period.
  - (b) Clarification on applying hedge accounting to contracts involving renewable electricity:  
 An entity may designate a variable notional amount of forecast electricity transactions—matching the variable amount of renewable electricity to be delivered by the generating facility referenced in the hedging instrument—as the hedged item. When designating such contracts as hedging instruments in a cash flow hedge, the forecast transaction is presumed to be highly probable if it depends on the delivery of electricity by the specified facility. Entities applying hedge accounting with such contracts shall disclose the terms and conditions of the hedge instruments by risk category in accordance with IFRS 7.
- 3) IFRS 17 "Insurance Contracts"  
 IFRS 17 "Insurance Contracts" replaces IFRS 4 and establishes the principles for the recognition, measurement, presentation, and disclosure of insurance contracts issued by an entity. This standard applies to insurance contracts issued (including reinsurance contracts), reinsurance contracts held, and investment contracts with discretionary participation features (DPF) issued, provided the entity also issues insurance contracts. Embedded derivatives, distinct investment components, and distinct performance obligations should be separated from the insurance contracts.

Upon initial recognition, an entity shall divide a portfolio of insurance contracts into three groups: onerous, those with no significant possibility of becoming onerous subsequently, and the remaining contracts. IFRS 17 requires a current measurement model where estimates are remeasured at each reporting period. The measurement is based on the elements of discounted probability-weighted cash flows, a risk adjustment, and a Contractual Service Margin (CSM) representing the unearned profit of the contract.

An entity may apply a simplified measurement approach, the Premium Allocation Approach (PAA), to a portion of the insurance contracts. Revenue from a group of insurance contracts is recognized over the period the entity provides insurance coverage and as the entity is released from risk. If a group of insurance contracts becomes onerous, the entity recognizes the loss immediately. An entity should present separately insurance revenue, insurance service expenses, and insurance finance income or expenses, and disclose information about the amounts, judgments, and risks arising from insurance contracts.

- 4) Amendments to IFRS 17 "Insurance Contracts"  
 The amendments include the deferral of the effective date, expected recovery of insurance acquisition cash flows, Contractual Service Margin (CSM) attributable to investment services, recovery of losses from reinsurance contracts held, and other revisions. These amendments do not change the fundamental principles of the standard.

- 5) Amendment to IFRS 17 "Initial Application of IFRS 17 and IFRS 9—Comparative Information"  
 This amendment permits an entity to elect to apply a classification overlay to a comparative period presented on initial application of IFRS 17. The election allows an entity to classify all financial assets, including those held in respect of an activity that is not connected to contracts within the scope of IFRS 17, on an instrument-by-instrument basis, based on how the entity expects those assets would be classified on initial application of IFRS 9 in the comparative period. Entities that have already applied IFRS 9 or will apply IFRS 9 and IFRS 17 concurrently may elect to apply the classification overlay.

c. Effects of IFRSs issued by IASB but not yet endorsed by FSC:

The following table summarizes the new, amended and revised standards in the IFRSs that have already been issued by the IASB but are yet to be endorsed by the FSC and related interpretations:

<u>New/Revised/Amended Standards and Interpretations</u>	<u>Effective Date Issued by IASB</u>
Amendments to IFRS 10 and IAS 28 "Sale or Contribution of Assets between an Investor and its Associate or Joint Venture"	To be determined
IFRS 18 "Presentation and Disclosure in Financial Statements"	January 1, 2027 (Note)
IFRS 19 "Subsidiaries without Public Accountability: Disclosures"	January 1, 2027
Amendments to IAS 21: Translation to a Hyperinflationary Currency	January 1, 2027

(Note) The Financial Supervisory Commission (FSC) announced in a press release dated September 25, 2025, that public companies are required to apply IFRS 18 starting from the fiscal year 2028. Furthermore, entities may elect to adopt IFRS 18 early once it has been endorsed by the FSC..

Except as described below, the above standards and interpretations have no significant impact on the Group's financial condition and financial performance based on the Group's assessment.

- 1) Amendments to IFRS 10 and IAS 28 "Sale or Contribution of Assets between an Investor and its Associate or Joint Venture"

These amendments address the inconsistency between the requirements in IFRS 10 and IAS 28. In transactions involving an investor's sale or contribution of assets to its associate or joint venture, the recognition of the full or partial gain or loss depends on the nature of the assets::

- (a) A full gain or loss is recognized when the assets sold or contributed constitute a "business."  
 (b) A partial gain or loss is recognized (only to the extent of the unrelated investors' interests in the associate or joint venture) when the assets sold or contributed do not constitute a "business."

- 2) IFRS 18 "Presentation and Disclosure in Financial Statements"

IFRS 18 replaces IAS 1 and updates the structure of the statement of profit or loss. It introduces new disclosure requirements for management-defined performance measures and enhances principles for aggregation and disaggregation across primary financial statements and notes.

- 3) IFRS 19 "Subsidiaries without Public Accountability: Disclosures"

This standard permits eligible subsidiaries to apply reduced disclosure requirements under IFRS.

As of the date of authorization of the Parent Company Only Financial Statements, the Company has continued to assess the effects of amendments to other standards and interpretations on its financial conditions and financial performance. Related impacts will be disclosed upon completion of the assessment

- 4) Amendments to IAS 21: Translation to a Hyperinflationary Currency

These amendments require that when an entity translates all amounts (including comparatives) from a functional currency that is not the currency of a hyperinflationary economy into a presentation currency that is the currency of a hyperinflationary economy, the entity shall translate those amounts using the closing rate at the date of the most recent statement of financial position. An exception is provided for entities where both the functional and presentation currencies are currencies of hyperinflationary economies, but the foreign operation has a functional currency of a non-hyperinflationary economy; such entities are exempt from re-translating comparative amounts. The amendments also introduce new disclosure requirements, including the translation method and summarized financial information of the foreign operations to which the translation method is applied.

As of the date of authorization of the Parent Company Only Financial Statements, the Company has continued to assess the effects of amendments to other standards and interpretations on its financial conditions and financial performance. Related impacts will be disclosed upon completion of the assessment

#### **(IV.) Summary of Significant Accounting Policies**

The main accounting policies used in preparing the parent company only financial statements are described below. Unless otherwise stated, these policies are consistently applicable throughout all reporting periods.

- a. Compliance declaration  
The parent company only financial statements have been prepared in accordance with the "Regulations Governing the Preparation of Financial Reports by Securities Issuers."
- b. Preparation basis
  - 1) Except for the following significant items, these parent company only financial statements have been prepared under the historical cost convention:
    - a) Financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.
    - b) Financial assets measured at fair value through other comprehensive income are measured at fair value.
    - c) Liability based on cash-settled share-based payment arrangement measured at fair value.
    - d) Defined benefit liability is derived from retirement plan assets less the present value of net defined benefit obligation.
  - 2) Significant accounting estimates are required when preparing financial statements based on the IFRSs recognized by FSC. When the Company adopts the accounting policies, the management is required to exercise judgments on highly judgmental or complex items or significant assumptions and estimates with regard to the financial statements. For more details, please refer to Note 5.
  - 3) When preparing parent company only financial statements, the Company adopts the equity method for investments in subsidiaries, affiliates or joint ventures. In order to align profit or loss, other comprehensive income, and equity from the current year in the Parent Company Only Financial Statements with those attributable to the Company's owners, the differences in accounting treatment with individual and consolidated basis have led to adjustments in "investments accounted for using the equity method," "share of profit or loss of subsidiaries, associates, and joint ventures accounted for using the equity method," "share of other comprehensive income of subsidiary, associates, and joint ventures accounted for using the equity method" and related equity items.
- c. Foreign currency conversion
  - 1) Foreign currency transactions and balances
    - a) Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions are recognized in profit or loss in the period in which they arise.
    - b) Balances of monetary assets and liabilities denominated in foreign currencies are adjusted at the spot exchange rates prevailing at the balance sheet date. Exchange gains or losses arising from such adjustments are recognized in profit or loss.
    - c) Non-monetary assets and liabilities denominated in foreign currencies that are measured at FVTPL, are retranslated at the exchange rates prevailing at the balance sheet date, where their translation differences are recognized in profit or loss as part of the fair value gain or loss. Non-monetary assets and liabilities denominated in foreign currencies measured at FVTOCI are retranslated at the exchange rates prevailing at the balance sheet date, where their translation differences are recognized in other comprehensive income. However, non-monetary assets and liabilities denominated in foreign currencies that are not measured at fair value are translated using the historical exchange rates at the initial transaction dates.
  - 2) Conversion of foreign operations
    - a) The operating results and financial position of all subsidiaries, affiliates, and jointly controlled entities that have a functional currency different from the presentation currency are translated into the presentation currency as follows:
      - i. Assets and liabilities for each balance sheet presented are translated at the closing exchange rate at the end of the financial reporting period;
      - ii. Income and expenses on the statements of comprehensive income are translated at the average exchange rates of that period; and
      - iii. All resulting exchange differences are recognized in other comprehensive income.

- b) When the foreign operation partially disposed of or sold is a related enterprise or jointly controlled entity, exchange differences that were recorded in other comprehensive income are proportionately reclassified to income as part of the profit or loss of sale. However, if the Company still holds partial interests in the former associate or jointly controlled entity but has already lost influence over the related enterprise or lost joint control over the jointly controlled entity, such transaction is accounted for as disposal of all interests in such foreign operation.
  - c) When the foreign operation that is partially disposed of or sold is a subsidiary, cumulative exchange differences that were recorded in other comprehensive income are proportionately transferred to the non-controlling interests in this foreign operation. However, if the Company still retains partial interests in the former foreign subsidiary after losing control of the former foreign subsidiary, such transactions should be accounted for as disposal of all interest in this foreign operation.
- d. The standards for assets and liabilities classified as current and non-current
- 1) Assets that meet one of the following criteria are classified as current assets:
    - a) Assets that are expected to be realized, or are intended to be sold or consumed within the normal operating cycle.
    - b) The holder primarily for trading purposes.
    - c) Assets expected to be realized within 12 months after the balance sheet date.
    - d) Cash or equivalent cash, except for those used to exchange or settle liabilities or subject to other restrictions more than 12 months after the balance sheet date.

The Company classifies all the assets that do not meet the above-mentioned criteria as non-current.

- 2) Liabilities that meet one of the following criteria are classified as current liabilities:
  - a) Liabilities that are expected to be settled within the normal operating cycle.
  - b) The holder primarily for trading purposes.
  - c) Those who are restricted by the exchange or liquidation of debts within 12 months after the end of each reporting period (after the end of each reporting period and the completion of the long-term refinancing or rescheduling payment agreement before the release of the financial statements, it is also considered as a current liability).
  - d) Where the entity does not have an unconditional right as of the balance sheet date to defer settlement of the liability for at least 12 months after the balance sheet date. Terms of a liability that could, at the option of the counter-party, result in its settlement by the issue of equity instruments do not affect its classification.

The Company classifies all the liabilities that do not meet the above-mentioned criteria as non-current.

e. Cash and cash equivalents

The cash and cash equivalents include cash in treasury, bank discount and short-term investments that can be converted into fixed cash at any time with little change in value at risk and high liquidity (including fixed deposit with an original date due within three months).

f. Financial instruments

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the financial instrument.

Initially, financial assets and liabilities should be recognized at fair value. Upon initial recognition, transaction costs that are directly attributable to the acquisition or issuance of the financial assets and financial liabilities (except for financial assets and financial liabilities at fair value through profit or loss) should be added to, or subtracted from the fair value of such financial assets and financial liabilities. Transaction costs that are directly attributable to financial assets and financial liabilities measured at FVTPL are recognized as the initial measurements of financial assets and financial liabilities.

1) Financial assets

a) Types of measurement

Financial assets purchased or sold in a regular way are recognized using transaction date accounting. Financial assets held by the Company comprise financial assets measured at fair value through profit or loss, financial assets at amortized cost, investments in debt instruments measured at fair value through other comprehensive income, and investments in equity instruments measured at fair value through other comprehensive income.

- i. Financial assets at fair value through profit or loss
 

Financial assets measured at FVTPL include financial assets measured at FVTPL and financial assets designated as measured at FVTPL. Financial assets measured at FVTPL include investments in equity instruments not designated by the Company as measured at FVTOCI and investments in debt instruments not classified as measured at amortized cost or FVTOCI. The financial assets measured at amortized cost or fair value through other comprehensive income at initial recognition would eliminate or significantly reduce a measurement or recognition inconsistency which would otherwise arise from measuring assets or liabilities or recognizing the gains and losses on them on different bases, the Company shall make an irrevocable choice to, at initial recognition, designate the financial asset as a financial asset measured at FVTPL.

Such assets are measured at fair value, of which any dividends accrued are recognized as other revenue, interest revenue and the benefits or losses arising from the re-measurement are recognized in other profits and losses. Please refer to Note 12 (3) for the methods of determination of fair value
- ii. Financial assets at amortized cost
 

A financial asset of the Company is measured at amortized cost if both of the following conditions are met:

  - i) Financial assets are under a business model whose purpose is to hold financial assets and collecting contractual cash flows; and
  - ii) The terms of the contract generate a cash flow on a specified date that is solely for the payment of interest on the principal and the amount of principal outstanding.

After initial recognition, financial assets measured at amortized cost are measured at the gross carrying amount determined based on the effective interest method less any impairment losses, and any gains or losses on foreign exchange are recognized in profit or loss.

Except for the following two situations, interest revenue is calculated by the effective interest rate multiplied by the gross carrying amount of financial assets:

  - i) For purchased or initial credit-impaired financial assets, interest income is calculated by applying the credit-adjusted effective interest rate to the amortized cost of the financial assets.
  - ii) For financial assets that are not purchased or originated credit-impaired but subsequently have become credit-impaired, interest income is calculated by applying the effective interest rate to the amortized cost balance of such financial assets.
- iii. Investments in debt instrument at fair value through other comprehensive income
 

Investments in debt instruments of the Company are classified as financial assets at FVTOCI if both of the following conditions are met:

  - i) It is held under a certain business model whose purpose is achieved by collecting contractual cash flows and selling financial assets; and
  - ii) The terms of the contract generate a cash flow on a specified date that is solely for the payment of interest on the principal and the amount of principal outstanding.

Investments in debt instruments at FVTOCI are measured at fair value. Among changes in the carrying amount, interest revenue calculated using the effective interest method, gain or loss on foreign exchange, and impairment loss of foreign exchange or gain on reversal of impairment loss of foreign exchange are recognized in profit or loss; other changes are recognized in other comprehensive income and reclassified as profit or loss upon disposal of investments.
- iv. Investments in equity instruments at fair value through other comprehensive income
 

At the time of original recognition, the Company make an irrevocable decision to designate an equity instrument that is neither held for trading nor contingent consideration arising from a business combination to be measured at fair value through other comprehensive income. Investments in equity instruments at FVTOCI are measured at fair value, and subsequent changes in the fair value are recognized in other comprehensive income and accumulated in other equity. Upon disposal of investments, the cumulative profit or loss is directly transferred to retained earnings and is not reclassified as profit or loss.

Dividends on investments in equity instruments at FVTOCI are recognized in profit or loss when the Company's right to receive payments is established, unless such dividends clearly represent the recovery of the investment cost in part.

- b) Impairment of financial assets
    - i. The Company assesses financial assets (including accounts receivable) measured at amortized cost based on expected credit losses on each balance sheet date, debt instrument investments measured at fair value through other comprehensive income, operating lease receivables, and Impairment losses on contract assets.
    - ii. Accounts receivable, contract assets and operating lease receivables are all recognized as allowance for losses based on the expected credit losses during the term of duration. For other financial assets, whether there is a significant increase in credit risk after initial recognition shall be determined first. If there is no significant increase in credit risk, the allowance for loss is recognized based on the 12-month expected credit losses. If there is a significant increase in credit risk, the allowance for loss is recognized based on the lifetime expected credit losses.
    - iii. The expected credit loss is based on the weighted average credit loss determined by the risk of default. The 12-month expected credit losses refer to expected credit losses arising from possible default of financial instruments within 12 months after the reporting date. The lifetime expected credit losses refer to expected credit losses arising from all possible default of financial instruments in the expected duration.
    - iv. The impairment loss of all financial assets is reduced by the allowance account to reduce its carrying amount, but the loss allowance of debt instrument investment measured at fair value through other comprehensive income is recognized in other comprehensive income and does not reduce its carrying amount.
  - c) Derecognition of financial assets
 

The Company will derecognize a financial asset when one of the following conditions is met:

    - i. The right to a contract from the financial asset cash flow is void.
    - ii. When transfer the contractual right to receive the cash flow of financial assets and almost all the risks and rewards of the ownership of the financial assets have been transferred.
    - iii. It neither transfers nor retains almost all the risks and rewards of the ownership of the financial assets, but does not retain the control over the financial assets.

On de-recognition of a financial asset measured at amortized cost, the difference between the asset's carrying amount and the sum of the consideration received is recognized in profit or loss. On derecognizing an investment in a debt instrument in its entirety at FVTOCI, the difference between the carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognized in other comprehensive income and accumulated in equity is recognized in profit or loss. On derecognizing an investment in an equity instrument at FVTOCI, the cumulative gain or loss which had been recognized in other comprehensive income is transferred directly to retained earnings, rather than reclassified as profit or loss.
- 2) Equity instruments
- The debt and equity instruments issued by the Company are classified as financial liabilities or equity instruments in accordance with the definition of financial liabilities and equity instruments and the contractual substance.
- Equity instruments refer to any contracts containing an enterprise's residual interest after subtracting liabilities from assets. Equity instruments issued by the Company are recognized as the net of proceeds less direct issuance costs.
- 3) Financial liabilities
- a) Subsequent measurement
 

Except the following situation, all the financial liabilities are measured at amortized cost using the effective interest method.

    - i. Financial liabilities measured at fair value through profit or loss refer to financial liabilities held for trading or designated as financial liabilities measured at fair value through profit or loss at the time of original recognition. A financial liability is classified as held for trading if has been acquired principally for the purpose of repurchasing it in the near term and is a derivative that is not designated and effective as a hedging instrument. When financial liabilities meet one of the following criteria, the Company designates them to be measured at FVTPL on initial recognition:
      - i) It is a hybrid (combined) contract containing embedded derivatives, where the main contract does not fall within the scope of IFRS 9 assets; or
      - ii) It is able to eliminate or significantly reduce a measurement or recognition inconsistency; or
      - iii) It is a tool to manage and evaluate its performance on a fair value basis in accordance with a documented risk management or investment strategy.

- ii. Financial liabilities at fair value through profit or loss are initially recognized at fair value. Related transaction costs are recognized in profits or losses. For subsequent fair value measurements, changes in fair value are recognized in current profit or loss.
    - iii. Designated as a financial liability measured at fair value through profit or loss, the amount of changes in fair value due to changes in credit risk is recognized in other comprehensive income, and will not be reclassified to profits or losses in the future. The remaining fair value changes in the liability are reported in profit or loss. However, if the above accounting treatment causes or exacerbates the improper accounting ratio, the profit or loss of the liability will be fully listed in profit or loss.
  - b) Derecognition of financial liabilities
 

The Company will derecognize a financial liability only when the obligation is discharged, cancelled or expired. When financial liabilities are derecognized, the difference between their carrying amount and the paid consideration (including any transferred non-cash assets or liabilities assumed) shall be recognized in profit or loss.
  - 4) The revision of Financial Instruments
 

When contractual cash flows of a financial instrument are renegotiated or modified without requiring the derecognition of the financial instruments, the Company will re-calculate the total book value amount or amortized cost of the financial liabilities using the contractual cash flows discounting at the original effective interest rate, and recognize the modified benefits and losses as profits and loss. Any costs or fees incurred will be reflected as an adjustment to the carrying book value amount of the modified financial instrument and amortized over the remaining period. If the renegotiation or revision leads to the derecognition of the financial instruments, then it should be in accordance with derecognition requirements.

The index rate revolution results in the variation of the contractual cash flows of financial instruments-determined bases and if such variation is directly required by the change in the index rate and the new basis is substantially the same as the basis before the change in the effective interest rate when determining. Aside from the change in rate in contractual cash flows bases, the variable changes in financial instruments also incurred. The Company will first adopt the practice of discretion to the changes required by to the changes required by the index rate change, then apply the regulations of financial instrument modification to any additional changes that are not applicable to the practical discretion.
- g. Inventories
 

Inventories are measured at the lower of cost and net realizable value. The perpetual inventory system is adopted and the cost is determined using the weighted average method. The cost of finished goods and work in process comprises raw materials, direct labor, other direct costs and related production overheads (allocated based on normal operating capacity). It excludes borrowing costs. The item-by-item approach is used in applying lower of cost and net realizable value. Net realizable value refers to the balance of the estimated selling price in the ordinary course of business less the estimated costs to be incurred till completion and related variable selling expenses.
- h. Subsidiaries and affiliates using the equity method
  - 1) Subsidiaries refer to all entities (including structured entities) controlled by the Company. The Company controls an entity when the Company is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.
  - 2) Unrealized gains or losses arising from the transactions between the Company and its subsidiaries have been eliminated. Accounting policies of its subsidiaries have been adjusted where necessary, and are consistent with the policies adopted by the Company.
  - 3) The Company's share of profit or loss in subsidiaries after acquisition is recognized in profit or loss, whereas its share of other comprehensive income in subsidiaries after acquisition is recognized in other comprehensive income. When the Company's share of losses in a subsidiary equal or exceeds its interest in the subsidiary, the company shall continue to recognize losses in proportion to its shareholding.
  - 4) A change in the shareholding of a subsidiary that does not result in loss of control (a transaction with a non- controlling interest) is treated as an equity transaction, that is, a transaction with the owner. The difference between the adjusted amount of non-controlling interest and the fair value of the consideration paid or received is directly recognized in equity.

- 5) When the Company loses control over a subsidiary, the retained investment in such former subsidiary is remeasured and the remeasured value is regarded as the fair value on initial recognition of a financial asset, or as the cost on initial recognition of an investment in an associate or joint venture. Difference between fair value and carrying amount is recognized in profit or loss. All amounts recognized in other comprehensive income in relation to that subsidiary should be accounted for on the same basis as would be required if the Company had directly disposed of the related assets or liabilities. Therefore, if a gain or loss previously recognized in other comprehensive income would be reclassified to profit or loss on the disposal of the related assets or liabilities, the company reclassifies the gain or loss from equity to profit or loss.
- 6) Associates are entities over which the Company has significant influence but not control. In general, it is presumed that an investor has significant influence, if an investor holds, directly or indirectly 20% or more of the voting power of the investee. Investments in associates by the Company are treated using the equity method and recognized at cost when acquired.
- 7) The Company's share of its associates' post-acquisition profits or losses is recognized in profit or loss, and its share of post-acquisition movements in other comprehensive income is recognized in other comprehensive income. If the Company's share of loss in any of its related enterprises equals or exceeds its interest in the related enterprise (including the book value and actual cost determined by the equity method, and part of any long-term interests from substantial net investments to the related businesses), it does not recognize further losses, unless it has legal obligations and constructive obligations in the related enterprise, or makes payments on behalf of the related enterprise.
- 8) Unrealized gains on transactions between the Company and its associates are eliminated to the extent of the Company's interest in the associates. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. The accounting policies of associates have been adjusted as necessary, and are consistent with the policies adopted by the Company.
- 9) Where an associate issues new shares and the Company does not subscribe or acquire new shares proportionately, which results in a change in the Company's ownership percentage of the associate but maintains significant influence on the associate, the "capital surplus" and "investments accounted for under the equity method" shall be adjusted for the increase or decrease of its share of equity interest. Where its investment proportion decreases, in addition to the above adjustments, the profit or loss previously recognized in other comprehensive income due to decrease in its ownership interest and the profit or loss to be reclassified to profit or loss during the disposal of assets or liabilities shall be reclassified to profit or loss based on the proportion of decrease.
- 10) Upon loss of significant influence over an associate, the Company shall remeasure the remaining investment retained in the former associate at its fair value. Any difference between the fair value and the carrying amount is recognized in profit or loss for the period.
- 11) When the Company disposes its investment in an associate and loses significant influence over this associate, the amounts previously recognized in other comprehensive income in relation to the associate are handled on the same basis as would be required if the relevant assets or liabilities were disposed of. That is, the profits or losses recognizes in other comprehensive income are reclassified to profit or loss upon disposal of such assets or liabilities. In circumstances where the Company loses significant influence over this associate, such assets or liabilities are reclassified to profit or loss. If the Company still has a significant influence on the related enterprise, only the amount of previously recognized in other comprehensive income is transferred according to the above-mentioned method.
- 12) When the Company disposes of its investment in an associate and loses significant influence over this associate, the amounts previously recognized as capital surplus in relation to the associate are transferred to profit or loss. If it retains significant influence over this associate, the amounts previously recognized as capital surplus in relation to the associate are transferred to profit or loss proportionately.
- 13) According to "Regulations Governing the Preparation of Financial Reports by Securities Issuers," the profit or loss of the period and other comprehensive income presented in parent company only financial statements shall be the same as the allocations of profit or loss of the period and of other comprehensive income attributable to owners of the parent presented in the financial statements prepared on a consolidated basis, and the owners' equity presented in the parent company only financial statements shall be the same as the equity attributable to owners of the parent presented in the financial statements prepared on a consolidated basis.

i. Property, plant, and equipment

- 1) Property, plant, and equipment are initially recorded at cost. Borrowing costs incurred during the construction period are capitalized. Before the completion of property, factories and equipment has reached the expected state of use, the samples of tested production of these assets are measured by the lower cost and net present value to see if the assets can operate normally. The sales price and cost are recognized in the income statement.
- 2) Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The replaced part of the carrying amount shall be derecognized. All other repair and maintenance costs incurred are recognized in current profit or loss during the period in which they are incurred.
- 3) Depreciation is not mentioned for land The cost model is adopted for other property, plant and equipment, which is depreciated on a straight-line basis based on the estimated useful life. The Company reviews the residual values, useful lives, and depreciation methods of each asset at the end of each financial year. If expectations for the assets' residual values and useful lives differ from previous estimates or the patterns of consumption of the assets' future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8 "Accounting Policies, Changes in Accounting Estimates and Errors" from the date of the change. The useful life of each asset is as follows:  
Buildings 5 - 55 years  
Machinery and equipment 5 - 18 years  
Transportation equipment 5 - 12 years  
Miscellaneous equipment 5 - 15 years
- 4) Property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. The amount of gain or loss arising from the derecognition of property, plant and equipment is the difference between the net disposal value and the carrying amount of the asset, and is recognized in current profit or loss.

j. Leases

The Company assesses whether the contract is (or includes) a lease on the date of its establishment. Where a contract includes a lease component and one or more additional lease or non-lease components, the Company allocates the consideration in the contract to the lease component on the basis of the relative separate price of each lease component and the aggregate separate price of non-lease components.

- 1) The Company is a lessee:

The Company recognizes right-of-use assets and lease liabilities at the beginning of the lease start date for other leases, except for leases of low-value underlying assets and short-term leases that recognize expenses on a straight-line basis.

Right-of-use assets

The right-of-use asset is initially measured at cost (including the original measured amount of the lease liability, the lease payment paid before the lease commencement date minus the lease incentive received, the original direct cost and the estimated cost of the recovery target asset), and subsequently measured at cost minus the accumulated depreciation and the accumulated impairment loss and adjusted for the remeasurement of the lease liability.

Except for right-of-use assets that meet the definition of investment property, right-of-use assets are listed on parent company only balance sheets as separate line items.

The right-of-use assets shall be depreciated on a straight-line basis from the beginning of the lease to the expiration of the term of the useful life or the expiration of the lease period, whichever is earlier. However, if the ownership of the underlying assets will be acquired at the end of the lease term, or if the cost of the right-of-use assets reflects the exercise of the purchase option, the depreciation shall be accrued from the beginning of the lease to the expiration of the term of the useful life of the underlying assets.

Lease liabilities

Lease liabilities are initially measured at the present value of lease payments (including fixed payments; substantive fixed payments; variable lease payments that are determined by an index or a rate; amounts expected to be paid by the lessee under residual value guarantee; the exercise price of a purchase option when it is reasonably certain to exercise the option; the term of the lease reflects the termination penalty that the lessee will exercise the option to terminate the lease, deducting the present value measurement of the lease incentives received. If the implied interest rate on the lease is easy to defined, the lease payment is discounted with the interest rate. If the interest rate is not easy to determine, the lessee's incremental borrowing rate shall be used.

Subsequently, the lease liability is measured on the basis of amortized cost using the effective interest method, and the interest expense is apportioned during the lease period. When there is a change in a lease term, valuation of exercise price of a purchase option of the underlying asset, expected payable amount based on residual value, or indexes or rates which are used to determine variable lease payments, resulting in a change in future lease payments, the Company re-measures the lease liabilities with a corresponding adjustment to the right-of-use assets. However, if the carrying amount of the right-of-use assets is reduced to zero, any remaining amount of the re-measurement is recognized in profit or loss. Lease liabilities are presented on a separate line in the parent company only balance sheets.

Changes in the lease agreement that do not depend on index or rate are recognized as expenses in the period in which they are incurred.

2) The Company is a lessor:

If a lease transfers almost all the risks and rewards attached to the ownership of the underlying asset, it is classified as a financial lease; otherwise, it is classified as an operating lease.

When a lease includes elements of land and buildings, the Company assesses the classification of each element as a financial lease or an operating lease, and apportions the lease payment (including any one-time front-end payment) to the land and buildings according to the fair value of the lease right of the land and buildings on the establishment date of the contract. When the lease payments cannot be allocated reliably between the land and building elements, the entire lease is generally classified as a finance lease unless it is clear that both elements are operating leases; in which case, the entire lease is classified as an operating lease.

When the Company sublets the right-of-use asset, it judges the classification of sublease based on the right-of-use asset (not the underlying assets). However, if the main lease is a short-term lease where the recognition exemption is applicable to the Company, the sublease is classified as an operating lease.

Finance lease liabilities are initially measured at the present value of lease payments (including fixed payments; in-substance fixed payments; variable lease payments that are determined by an index or a rate; amounts expected to be paid by the lessee under residual value guarantees; the exercise price of a purchase option when it is reasonably certain to exercise the option; and penalties for terminating the lease reflected in the lease term; less any lease incentives receivable). The net amount of lease investment is measured as the sum of the present value of lease receivables and unguaranteed residual value plus the original direct cost and expressed as finance lease receivable. The Company allocates the financing income to the lease term on a systematic and reasonable basis to reflect the fixed rate of return that the unexpired net lease investment can obtain on a regular basis.

In the case of operating leases, the lease payment after deducting the lease incentives is recognized as the lease income on a straight-line basis over the lease term. The initial direct costs arising from acquisition of operating leases is added to the carrying amount of the underlying assets; and an expense is recognized for the lease on a straight-line basis over the lease term.

Changes in leases that do not depend on an index or a rate in lease agreements are recognized as expenses in the period in which they take place.

k. Investment properties

Investment real estate refers to real estate held for rent or capital appreciation or both (including real estate in the process of construction for these purposes) Investment property also includes land whose future use is yet to be decided. Investment property also includes right-of-use assets that meet the definition of investment property.

Self-owned investment property is initially measured at cost (including transaction costs), and subsequently measured at cost less accumulated depreciation and accumulated impairment losses. Depreciation is recognized on a straight-line basis.

Investment property under construction is recognized at cost less accumulated impairment loss. Cost includes professional service fees and borrowing costs that are eligible for capitalization. Depreciation of such assets begins when they reach the expected state of use.

In the event of derecognition of an investment property, it is the difference between the net disposal price and the carrying amount of the asset, and is recognized in the current profits and losses.

l. Impairment of financial assets

The Company estimates the recoverable amount of assets that have signs of impairment on the balance sheet date. When the recoverable amount is lower than its carrying amount, impairment loss is recognized. Recoverable amount refers to the fair value of an asset less costs to sell or its value in use, whichever is higher. When the recognition of asset impairment in the previous year no longer exists, the impairment loss is reversed to the extent of the amount of losses recognized in the previous year.

- m. Provisions  
 Provision is a present legal or constructive obligation arising from a past event, where an inflow of economic benefits is probably required to pay off the obligation. The obligation can also be recognized when its amount can be estimated reliably. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation on the balance sheet date, which is discounted using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the obligation. When discounting is used, the increase in the provision due to passage of time is recognized as interest expense. Provisions are not recognized for future operating losses.  
 Carbon fees levied under the Climate Change Response Act of the ROC (Taiwan) and its subsidiary laws are not within the scope of IFRIC 21 "Levies," but are recognized and measured in accordance with IAS 37 "Provisions, Contingent Liabilities and Contingent Assets." If it is probable that the estimated annual emissions will exceed the threshold, the related carbon fee liability in interim financial reports should be estimated based on the proportion of actual emissions incurred to the total estimated annual emissions.
- n. Employee Benefits
- 1) Short-term employee benefits  
 Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid and should be recognized as expenses in the period when the employees render service.
  - 2) Pension
    - a) Defined contribution plans  
 Under a defined contribution plan, the amount of pension funds that should be contributed on an accrual basis is recognized as current pension expense. Prepaid contributions are recognized as an asset to the extent of a cash refund or a reduction in the future payments.
    - b) Defined benefit plans
      - i. The determination of the net obligation under the defined benefit plan is based on the discounted amount of future benefits earned by employees during the current or past periods when services are (were) rendered. Such obligation is recognized at the amount of the net of the present value of the net defined obligation less the fair value of the plan asset. The defined benefit obligations are calculated each year by the actuary through the projected unit credit method. The discount rate employed is the market yields on high quality corporate bonds (on the balance sheet date) of which the currency and term are consistent with the currency and term of the defined benefit plan. The discount rate employed can also be the market yields on corporate bonds if there is no deep market for such bonds in the country.
      - ii. Determine the re-measurement amount caused by the benefit plan and recognize it as other comprehensive profits or losses during the occurrence period, and express it as retained earnings.
      - iii. Expenses related to past service costs are immediately recognized as gains or losses.
  - 3) Compensation to directors and employees  
 Employees' compensation and directors' and supervisors' compensation are recognized in expenses and liabilities when they are subject to legal or constructive obligations, and when the amounts can be reasonably estimated. Any difference between the actual amount allocated after the resolution and the estimated amount is treated as changes in accounting estimates.
  - 4) Termination benefits  
 Termination benefits are benefits that are provided when an employee is dismissed before the normal retirement date or when an employee decides to accept the Company's offer of benefits in exchange for earlier termination of employment. The Company recognizes expenses at the earlier of when it can no longer withdraw the termination contracts or when it recognizes relevant restructuring costs. Benefits that are not expected to be fully settled within 12 months after the balance sheet date shall be discounted.
- o. Share capital and treasury shares
- 1) Share capital  
 Common stock is listed as equity. An incremental cost directly attributable to the issuance of new shares or warrants stated in equity is presented under equity as a deduction to proceeds.
  - 2) Treasury stock  
 Issued shares repurchased by the Company are recognized in "treasury stock" as a deduction to equity based on the amount of consideration paid during share buyback (including directly attributable costs). When the disposal price for a treasury stock is higher than its carrying amount, the difference between its disposal price and its carrying amount is listed as capital reserve - treasury stock transactions. When its disposal price is lower than its carrying amount, the difference between the above shall offset against capital reserve arising from the trading of the same type of treasury stock. If deficiency arises, it is debited into retained earnings. The carrying amount of a treasury stock is determined using weighted average and calculated separately based on reasons for repurchase.

During retirement, treasury stock is debited into capital reserve - premium on issued shares and share capital according to the proportion of shares. If its carrying amount is higher than the sum of its face value and premium on issued shares, the difference between both of the above shall be offset against capital reserve arising from the trading of the same type of treasury shares. If deficiency arises, it is then offset against retained earnings. If its carrying amount is lower than the sum of its face value and premium on issued shares, the difference between the aforementioned shall be debited into capital reserve arising from the trading of the same type of treasury share.

p. Income tax

- 1) The tax expense for the period comprises current and deferred tax. Tax is recognized in profit or loss, except to the extent that it relates to items recognized in other comprehensive income or items recognized directly in equity, in which cases the tax is recognized in other comprehensive income or equity.
- 2) The current income tax expense is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date where the Company generates taxable income. Senior management regularly assesses the status of income tax returns in accordance with applicable income tax-related regulations, and shall estimate income tax liabilities based on taxes that are expected to be paid to the tax authority when necessary. An additional income tax is levied on undistributed earnings in accordance with the Income Tax Act. After the distribution plan for the earnings generated in the current year is approved at the shareholders' meeting in the following year, undistributed earnings shall be recognized as income tax expense based on the actual distribution of earnings.
- 3) Deferred income tax is recognized, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the parent company only balance sheets. The deferred income tax liabilities arising from the originally recognized goodwill are not recognized. If the deferred income tax originates from the initial recognition of assets or liabilities in transactions (excluding merger) and does not affect accounting profits or taxable incomes (taxable losses) at the time of transactions, and if, at the time of the transaction, the transaction does not give rise to equal amounts of taxable and deductible temporary differences, it is not recognized. Deferred income tax is provided on temporary differences arising on investments in subsidiaries, except where the timing of the reversal of the temporary difference is controlled by the Company and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.
- 4) Deferred income tax assets are recognized to the extent that temporary differences, unused tax losses and unused tax credits are likely to be available for future tax income. The unrecognized and recognized deferred income tax assets are reassessed on each balance sheet date.
- 5) Current income tax assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. Deferred tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on a net basis, or realize the asset and settle the liability, simultaneously.
- 6) Tax incentives from acquisitions of equipment or technology, research and development expenditures, employees' training costs and equity investments are recognized in the form of tax credits.

q. Revenue recognition

The recognition principle on the revenue of the Company from customer contracts is as follows:

- 1) Identify the customer contracts;
- 2) Identify the performance obligations in the contract;
- 3) Determine the transaction price;
- 4) Allocate the transaction price to the performance obligations in contracts; and
- 5) Recognize revenue upon satisfaction of performance obligations.

a) Sales revenue

The Company recognizes revenue when control over products is transferred to customers. The transfer of control over products means that products are delivered to customers with no unfulfilled obligations that may affect customers' acceptance of the products. Deliver refers to the time when customers accept products based on the terms of transactions, the risk of obsolescence and loss is transferred to customers, and the Company has objective evidence that all acceptance conditions are met.

The Company recognizes accounts receivable when goods are delivered, as it has the right to receive the payment unconditionally at that time.

When material is supplied for processing, control over the ownership of processed goods is not transferred.

Thus, supply of material is not recognized as revenue.

b) Service revenue

The Company provides service as an OEM and recognizes revenue when service is transferred to customers (that is, control over assets is obtained by customers) without subsequent obligations.

r. Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their capital expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

Other than those stated above, all other borrowing costs are recognized as profit or loss in the period in which they are incurred.

**(V.) Major Sources of Uncertainties in Material Accounting Judgments, Estimates, and Assumptions**

The Company incorporates the economic impacts resulting from climate change and related government policies and regulations/Russia and Ukraine military conflicts and associated international sanctions/inflation and market interest rate fluctuations into significant accounting estimates and continuously monitors underlying assumptions and estimates. If the revision of estimates affects only the current period, it is recognized in the period of revision; if the revision of accounting estimates affects both the current period and future periods, it is recognized in both the current period and future periods.

When the Company prepares the parent company only financial statements, the significant judgments, estimates, and assumptions used in the accounting policies adopted by the Company are as follows:

a. Significant judgments for applying the accounting policies

1) Judgments on the business model of classification of financial assets

The Company assesses the business model of financial assets based on the class of financial assets managed to achieve the specific business purpose. This assessment requires all relevant evidence, including the measurement method for asset performance, risk of impact on performance, and compensation for the management, and also requires judgment. The Company continues to assess whether the business model is judged appropriately and monitor the financial assets measured at amortized cost and investments in debt instruments at FVTOCI derecognized before maturity to determine whether such disposal is consistent with the purpose of the business model. If it finds that the business model has changed, the Company will reclassify financial assets in accordance with IFRS 9 requirements, and applied prospectively from the date of reclassification.

2) Investment properties

The Company holds certain properties for the purposes of earning rentals or capital appreciation, whereas the some are for own use. When each part of a property cannot be sold separately and cannot be leased out separately through finance leases, the property is classified as investment property only if the part held for own use is not significant relative to the individual property,.

3) Revenue recognition

According to IFRS 15, the Company judges whether control over specific goods or service is obtained prior to the transfer of such products or service to customers and whether it is the principal or agent in the transaction. If the Company is the agent in the transaction, the net amount of the transaction is recognized as revenue.

The Company is the principal if any of the following conditions applies:

- a) The Company acquires control of the goods or assets in advance from another party before they are transferred to customers; or
- b) By controlling the right of provision of service by another party, the Company has the discretion to have another party to provide services to customers on behalf of the Company; or
- c) The goods or services provided to customers are a combination of other goods or services and the goods and services of which the control is obtained by the Company from another party.

Indicators used to help judge whether the Company controls specific products or service before the transfer of such products or service to customers include (but are not limited to):

- a) The Company takes main responsibility for the commitment of completing the provision of specific commodity or labor service.
- b) The Company bears the inventory risk before and after the specific goods or services is transferred to the customer.
- c) The Company has discretionary power to set prices.

4) Lease term

In determining the lease term, the Company considers all relevant facts and circumstances that give rise to an economic incentive to exercise (or not to exercise) the option, including all expected changes in facts and circumstances from the commencement date to the exercise date of the option. Factors to be considered include the contractual terms and conditions for the period covered by the option, significant leasehold improvements made (or anticipated) during the contract period, the significance of the

underlying assets to the Company's operations, etc. The lease period is reassessed whenever there are significant events or changes in circumstances within the control of the Company.

b. Significant accounting related estimates and assumptions

1) Estimated impairment of financial assets

The estimated impairment of accounts receivable is based on the Company's assumed default rate and expected loss rate. The Company considers the historical experience, current market conditions, and forward-looking information to make assumptions and select the inputs for impairment assessment. Where the future cash flows are less than expected, a material impairment loss may arise.

2) Fair value measurement and valuation process

When assets and liabilities measured at fair value have no quoted prices in an active market, the Company determines based on relevant laws and regulations or its judgment whether assets and liabilities are valued externally and determines the appropriate fair value valuation techniques. If the estimated fair value cannot be derived from Level 1 inputs, the Company shall determine the inputs with reference to the analysis of financial conditions and operating results of investees, recent transaction prices, quoted prices of the same equity instruments in a non-active market, quoted prices of similar instruments, and valuation multiples of comparable companies. If changes in future inputs are not as expected, changes in the fair value may occur. The Company regularly updates inputs based on market conditions to monitor the appropriateness of fair value measurement. For descriptions of fair value evaluation techniques and input values, please refer to Note 12 (3) for details.

3) Impairment assessment of tangible assets and intangible assets

The company assesses the impairment of assets based on its subjective judgment and determines the separate cash flows of a specific group of assets, useful lives of assets and the future possible income and expenses arising from the assets depending on how assets are utilized and their industrial characteristics. Any changes in these estimates arising from changes in economic conditions or business strategies could lead to significant impairment losses in the future.

4) Investment loss assessment using the equity method

When there is an indication that an investment accounted for using the equity method may be impaired, the company will immediately assess the impairment of the investment. The company assesses the recoverable amount based on the discounted value of the expected future cash flows from the investee or the discounted value of future cash flows arising from expected cash dividends and disposal of the investment, and assesses the reasonableness of underlying assumptions.

5) Realizability of deferred income tax assets

Deferred tax assets are recognized only when it is probable that sufficient taxable profits will be available against which the deductible temporary differences can be utilized in the future. When the realizability of deferred tax assets is assessed, it is necessary to involve significant accounting judgments and estimates of the senior management, including assumptions on future growth in sales revenue and profit margins, tax exemption periods, available tax credits, and tax planning. Any changes in the global economic environment and industrial environment, as well as changes in laws and regulations may result in major adjustments to deferred tax assets.

6) Evaluation of inventories

As inventories are stated at the lower of cost and net realizable value, the Company must determine the net realizable value of inventories on balance sheet date using judgments and estimates.

The Company evaluates the amounts of normal inventory consumption, obsolete inventories or inventories without market selling value on balance sheet date, and writes down the cost of inventories to the net realizable value.

7) The calculation of a net defined benefit asset (liability)

When calculating the present value of the defined benefit obligations, the Company must use judgments and estimates to determine the relevant actuarial assumptions on the balance sheet date, including the discount rate and the future growth rate of salaries. Any changes in actuarial assumptions may lead to significant effects on the amount of the Company's defined benefit obligations.

8) Lessee's incremental borrowing rate of interest

When determining the lessee's incremental borrowing rate of interest used for lease payment discounting, the reference interest rate is the risk-free interest rate of the same currency and the relevant period, and the estimated lessee credit risk discount and lease specific adjustment (such as asset specific and secured factors) are taken into account.

**(VI.) Explanation of Important Accounting items**

## a. Cash and cash equivalents

Items	December 31, 2025	December 31, 2024
Cash	\$954	\$639
Bank deposits	1,272,709	909,430
Cash equivalents (short-term commercial papers due within three months)	867,112	955,990
Total	<u>\$2,140,775</u>	<u>\$1,866,059</u>

- 1) The Company deals with financial institutions having high credit quality. The Company also deals with various financial institutions in order that credit risks can be diversified. Therefore, the expected risk of default is pretty low.
- 2) The Company's original maturity date is more than three months' time deposits transferred to other financial assets - current, the details are as follows:

Items	December 31, 2025	December 31, 2024
Time deposit (the original maturities of more than three months)	\$150,000	\$250,000

- 3) The Company did not pledge cash or equivalent cash as of December 31, 2025 and 2024.

## b. Financial assets and liabilities at fair value through comprehensive income

Items	December 31, 2025	December 31, 2024
Financial assets-current		
Forced measure at fair value through comprehensive income		
Non-derivative financial assets		
Beneficiary certificate of fund	\$18,141	\$17,860

1. The Company has not provided any collateral for financial assets measured at fair value through profit or loss.
2. Details of the related credit risk management and evaluation methods are shown in Note 12(2).

## c. Financial assets at fair value through other comprehensive income - current

Items	December 31, 2025	December 31, 2024
Equity instruments		
Stocks listed in TWSE or TPEX	\$2,384,995	\$2,527,578
Fund beneficiary certificates	10,061	10,061
Subtotal	\$2,395,056	\$2,537,639
Valuation adjustments	757,720	175,297
Total	<u>\$3,152,776</u>	<u>\$2,712,936</u>

- 1) The Company has chosen to classify the equity investments of domestic listed companies with stable dividends as financial assets measured at FVTOCI, which were valued at NTD3,152,776 thousand and NTD2,712,936 thousand respectively for year December 31, 2025 and 2024.
- 2) In 2025 and 2024, the Company adjusted its investment position to diversify its risk. As for the sale of some common stocks and beneficiary certificates of the listed companies at fair value of NTD 1,012,612 thousand and NTD669,522 thousand, respectively, and the related other equity - unrealized gain (loss) on financial assets at fair value through other comprehensive income amounted to NTD 437,966 thousand and NTD249,527 thousand, respectively, were transferred to retained earnings.
- 3) The Company did not pledge financial assets (current) measured at fair value through other comprehensive income as of December 31, 2025 and 2024.
- 4) Please refer to Note 12(2) for details of relevant price risk information.

d. (Net) Notes receivable and notes receivable - (Net) related parties

Items	December 31, 2025	December 31, 2024
Notes receivable		
Occurs due to business	\$38,819	\$37,708
Less: provision for losses	(1,165)	(1,131)
(Net) Notes receivable	\$37,654	\$36,577
Notes receivable - related parties	-	-
Occurs due to business	-	\$1,555
Less: provision for losses	-	-
Accounts receivable - related parties, net	\$38,819	\$1,555

- 1) As of December 31, 2025 and 2024, the Company did not pledge any notes receivable as collateral.
- 2) Disclosure of allowance for losses on notes receivable, please refer to the description of accounts receivable below.

e. (Net) Accounts receivable and accounts receivable - (Net) related parties

Items	December 31, 2025	December 31, 2024
<u>Account receivables</u>		
Measured at amortized cost		
Total Carrying Amount	\$305,329	\$332,623
Less: provision for losses	(10,543)	(10,686)
(Net) Accounts receivable	\$294,786	\$321,937

Items	December 31, 2024	December 31, 2022
<u>Trade receivables - related party</u>		
Measured at amortized cost		
Total Carrying Amount	\$25,025	\$43,667
Less: provision for losses	(312)	(685)
(Net) Accounts receivable - related parties	\$24,713	\$42,982

- 1) The Company's accounts receivable from the sale of goods met the credit standards according to the industry characteristics, business scale, and profitability of its counterparties, where the average credit period was between 60-120 days.
- 2) The Company did not pledge the accounts receivable as of December 31, 2025 and 2024.
- 3) The Company adopts the simplified method to recognize the allowance loss of notes receivable and accounts receivable according to the expected credit loss during the duration. The lifetime expected credit losses took into account the past history of default and the current financial and operating conditions of customers. There was no significant difference in the loss patterns between different customer bases according to the historical experience of the company's credit losses. Therefore, the provision matrix did not further differentiate customer bases but only set the expected credit loss rate based on the overdue days of accounts receivable.

The Company uses the provision matrix to measure the loss of allowance on notes receivable and accounts receivable (including related parties) as follows:

December 31, 2025	Total Carrying Amount	Loss allowance (lifetime ECLs)	Amortized Cost
Not past due	\$336,457	\$9,655	\$326,802
0 to 30 days overdue	25,085	1,254	23,831
31 to 180 days overdue	6,755	676	6,079
181 to 365 days overdue	876	435	441
More than one year overdue	-	-	-
Total	<u>\$369,173</u>	<u>\$12,020</u>	<u>\$357,153</u>

December 31, 2024	Total Carrying Amount	Loss allowance (lifetime ECLs)	Amortized Cost
Not past due	\$382,366	\$10,799	\$371,567
0 to 30 days overdue	32,337	1,617	30,720
31 to 180 days overdue	848	85	763
181 to 365 days overdue	2	1	1
More than one year overdue	-	-	-
Total	<u>\$415,553</u>	<u>\$12,502</u>	<u>\$403,051</u>

The expected credit loss rate of the Company in each of the age of receivables mentioned on above (excluding abnormal accounts, 100% of which shall be presented), not overdue as 3%, 5% within 30 days overdue, 10% within 180 days overdue, 50% within 181 to 365 days overdue, and 100% overdue for more than one year.

- 4) The changes in the allowance loss of notes receivables and accounts receivables (including notes receivables, accounts receivables and collections) are as follows:

Items	December 31, 2025	December 31, 2024
Beginning balance	\$12,502	\$8,572
Add: Provision of impairment loss	-	3,930
Less: Reversal of impairment loss	(482)	-
Less: Write-off of unrecoverable accounts	-	-
Ending balance	<u>\$12,020</u>	<u>\$12,502</u>

The amounts shown above did not include other credit enhancements.

- 5) Please refer to Note 12 (2) for details of relevant credit risk management and assessment methods.

f. Inventories and operating cost

Items	December 31, 2025	December 31, 2024
Raw materials	\$45,733	\$72,718
Materials	46,038	50,252
Work in process	155,717	193,768
Finished goods	141,636	143,752
Total	<u>\$389,124</u>	<u>\$460,490</u>

- 1) The inventory gains (losses) recognized as operating costs in the current period are as follows:

Items	December 31, 2025	December 31, 2024
Cost of goods sold	\$1,662,242	\$1,534,634
Unallocated manufacturing costs	2,571	6,748
Write-downs of inventories and obsolescence loss (gain from price recovery)	(276)	(1,266)
Income from sale of scraps	(2,517)	(2,841)
Total operating costs	<u>\$1,662,020</u>	<u>\$1,537,275</u>

- 2) In 2025 and 2024, the Company offset the inventory to the net realizable value or recovered the net realizable value of the inventory due to the digestion of inventory. As a result, the loss (gains on inventory value recoveries) of inventory depreciation recognized by the Company was NTD(276) thousand and NTD(1,266)thousand, respectively.
- 3) The Company did not pledge the inventory as of December 31, 2025 and 2024.

g. Financial assets at fair value through other comprehensive income - non-current

Items	December 31, 2025	December 31, 2024
Investments in equity instruments		
Domestically unlisted stocks	\$130,737	\$127,287
Valuation adjustments	105,265	85,481
Subtotal	236,002	212,768
Investments in liability instruments		
Corporate Bonds	192,083	167,882
Valuation adjustments	(4,468)	(9,311)
Subtotal	187,615	158,571
Total	\$423,617	\$371,339

- 1) According to the long-term strategic objectives, Tahsin Group invested in the unquoted shares and corporate bonds of the domestic market mentioned above. The company invests in the stocks of the aforementioned domestic OTC companies pursuant to its medium-term and long-term strategies for the purpose of making a profit. The management of the Company believes that if the short-term fair value fluctuations of these investments are included in the profit and loss, it is inconsistent with the aforementioned long-term investment plan, so they choose to designate these investments as measured at fair value through other comprehensive income.
- 2) As of December 31, 2025 and 2024, the Company did not pledge any financial assets - non-current measured at fair value through other comprehensive income.
- 3) Please refer to Note 12 (2) for details of relevant credit risk management and assessment methods.

h. Investments Accounted for Using the Equity Method

Investee	December 31, 2025	December 31, 2024
Subsidiary:

Total undiscounted lease payments	<u>\$15,668</u>	<u>\$23,456</u>

3) Important lease activities and terms

The Company leases the building for use as an office with a lease term of 4 years. In accordance with the contract, the Company shall not sublet the leased asset to others without the consent of the lessor.

As of December 31, 2025 and 2024, the right-of-use assets showed no signs of impairment with assessment.

4) Other lease information

- Please refer to Note 6 (9) "Property, plant and equipment" and Note 6 (11) "Investment properties" for the agreement on the lease of the Company's own property, plant and equipment and investment property under operating leases.
- In 2025 and 2024, the Company decided to apply recognition exemption to short-term lease and low value asset lease, and not recognize related right-of-use assets and lease liabilities for the said leases.
- The information on lease-related expenses of the Company in 2025 and 2024 is as follows:

Items	December 31, 2025	December 31, 2024
Expenses relating to short-term leases	<u>\$631</u>	<u>\$700</u>
Expenses relating to low-value asset lease	<u>\$146</u>	<u>\$139</u>
Variable lease payments not included in lease liability measurement	--	--

- 2) Rental revenue and direct operating expenses of investment property:

Items	December 31, 2025	December 31, 2024
Rental income from investment property	\$26,885	\$18,264
Direct operating expenses incurred from investment properties that generate current rental income that generates rental income in the current period	\$617	\$544
Direct operating expense from investment property that do not generate rental income in the current period	\$884	\$953

- 3) The lease term of investment property is 2-3 years. The lessee does not have a bargain purchase option to acquire the asset at the expiration of the lease periods.
- 4) The total amount of lease payments that to be collected in the future for investment property by operating leases is as follows:

	December 31, 2025	December 31, 2024
Year 1	\$21,720	\$17,990
Year 2	17,056	13,500
Year 3	-	9,150
Year 4	-	-
Year 5	-	-
More than 5 years	-	-
Total	<u>\$38,776</u>	<u>\$40,640</u>

- 5) The fair value of the investment properties held by the Company was NTD2,418,715 thousand as of December 31, 2025. The fair value was based on the valuation results provided by independent valuation experts, conducted between October and November 2025. The valuation methods employed the

Comparison Approach, the Income Approach, and the Land Development Analysis Approach to estimate the unit price of the land, with the final appraised value determined through a weighted approach.

- 6) The fair value of the investment property held by the Company as at December 31, 2025 and 2024 was NTD1,523,171 thousand as estimated from the transaction prices of land or buildings located in the adjacent areas inquired by the "Registering the Actual Selling Price of Real Estate" of Department of Land Administration, Ministry of the Interior.
  - 7) For information on guarantees provided by investment property, please refer to Note 8.
- l. Pension
- 1) Defined contribution plans
    - a) The Company adopts a pension plan under the "Labor Pension Act," which is a state-managed defined contribution plan. According to the Labor Pension Act, the Company makes monthly contributions at 6% of their monthly salaries to employees' individual pension accounts in the Bureau of Labor Insurance.
    - b) Contributions made in accordance with the specific percentage stipulated in the defined contribution plan amounted to NTD5,896 thousand and NTD5,557 thousand for the years ended December 31, 2025 and 2024 respectively, and were recognized as expenses in the parent company only statements of comprehensive income.
  - 2) Defined benefit plans
    - a) The Company's pension system under the "Labor Standards Act" of the Republic of China (Taiwan) is a defined welfare retirement plan managed by the government. The payment of the employee's pension is based on the period of service and the average salary of 6 months before the approved retirement date. The Company contributes monthly an amount equal to 9% of the employees' monthly salaries to a retirement fund that is deposited in Bank of Taiwan under the name of The Supervisory Committee of Workers' Retirement Fund. Before the end of year, if the balance at the retirement fund is not sufficient to pay employees who will meet the retirement criteria next year, a lump-sum deposit for the shortfall should be made to put in The Bureau of Labor Funds, Ministry of Labor administers the account. Once before the end of March of the following year. However, The Company has no right over its investment and administration strategies.
    - b) The amounts recognized in the balance sheet for obligations from defined benefit plans are as follows:

Items	December 31, 2025	December 31, 2024
Present value of defined benefit obligations	(\$282,037)	(\$276,228)
Fair value of plan assets	306,053	291,211
Net Defined Benefit (Liabilities) Assets	<u>\$24,016</u>	<u>\$14,983</u>

c) Changes in net defined benefit liabilities are as follows:

Items	Present value of defined benefit obligations	Fair value of plan assets	Net defined benefit liabilities
Balance as of January 1, 2025	(\$276,228)	\$291,211	\$14,983
Service costs			
Current service costs	(1,121)	-	(1,121)
Interest expenses (income)	(4,143)	4,396	253
Recognized in profit or loss	(5,264)	4,396	(868)
Remeasurements			
Return on planned assets (excluding the amounts included in net interest)	--	20,616	20,616
Actuarial (profits) losses -			
Change of population statistic assumption	-	-	-
Changes in financial assumptions	(5,347)	-	(5,347)
Experience adjustments	(9,903)	-	(9,903)
Recognized in other comprehensive income	(15,250)	20,616	5,366
Employer provision	-	3,485	3,485
Welfare payment amount	14,705	(13,655)	1,050
Balance as of December 31, 2025	(\$282,037)	\$306,053	\$24,016

Items	Present value of defined benefit obligations	Fair value of plan assets	Net defined benefit liabilities
Balance as of January 1, 2024	(\$275,578)	\$272,224	(\$3,354)
Service costs			
Current Service costs	(1,369)	-	(1,369)
Previous service cost	75	(-	(75)
Interest expenses (income)	(3,226)	3,240	14
Recognized in profit or loss	(4,670)	3,240	(1,430)
Remeasurements			
Return on planned assets (excluding the amounts included in net interest)	-	24,557	24,557

Employer provision	-	3,782	3,782
Welfare payment amount	13,964	(12,592)	1,372
Balance as of December 31, 2024	(\$276,228)	\$291,211	\$14,893

d) The Company is exposed to the following risks due to the implementation of the pension system under the Labor Standards Act: The Company is exposed to the following risks due to:

i. Investment Risks

The Bureau of Labor Funds, Ministry of Labor invests the labor pension fund in equity securities, debt securities, and bank deposits in domestic (foreign) banks through independent implementation and commissioned operations. However, the distributed amount from the plan assets received by the Company shall not be lower than interest on a two-year time deposit at a local bank.

ii. Interest rate risk

The decline in the interest rate of government bonds will increase the present value of defined welfare obligations, and at the same time, the debt investment return of the planned assets will also increase accordingly. Both of which will partially offset the impact of the net defined welfare liabilities.

iii. Salary risk

The calculation basis for determining the present value of the benefit obligation is to refer to the future salaries of the project members. Therefore, the salary increase of plan members will increase the present value of the defined benefit obligation.

- e) The present value of the determined benefit obligation formulated by the Company is calculated by certified actuaries. The principal assumptions adopted on the valuation date are as follows:

Items	Valuation date	
	December 31, 2025	December 31, 2024
Discount rate	1.25%	1.50%
Rate of future salary increase	3.00%	3.00%
Average duration of defined benefit obligations	7.7 years	8.3 years

- i. Future Mortality Rate is estimated based on the 2021 Taiwan Standard Ordinary Experience Mortality Table.
- ii. If the major actuarial assumptions are subject to reasonably possible changes with other assumptions unchanged, the present value of defined benefit obligations will increase (decrease) as follows:

Items	December 31, 2025	December 31, 2024
Discount rate	1.25%	1.50%
Increase 0.25%	(\$5,347)	(\$5,606)
Decrease 0.25%	\$5,505	\$5,779
Rate of future salary increase	3.00%	3.00%
Increase 0.25%	\$5,321	\$5,597
Decrease 0.25%	(\$5,196)	(\$5,458)

As actuarial assumptions may be related to one another, the likelihood of fluctuation in a single assumption is not high. Therefore, the aforementioned sensitivity analysis may not reflect the actual fluctuations of the present value of defined benefit obligations.

- f) The Company expects to make contributions of NTD3,120 thousand to the pension plans in the year ended December 31, 2026.

m.

n. Provisions - Current

Item	December 31, 2025	December 31, 2024
Salaries and bonuses payable	\$61,406	\$61,644
Insurance premiums payable	4,552	4,334
Processing fees payable	6,660	10,057
Payables on equipment	13,025	10,895
Pension payable	1,056	989
Employees' remuneration payable	4,767	5,408
Directors' remuneration payable	780	1,140
Other payable	20,780	31,360
Total	\$113,026	\$125,827

o. Provisions - Current

Items	December 31, 2025	December 31, 2024
Beginning balance	\$8,458	\$8,458
Current additional provisions recognized	6,628	6,601
Current reductions arising from payments	(6,628)	(6,601)
Ending balance	<u>\$8,458</u>	<u>\$8,458</u>

Provisions were calculated by estimating compensation for employees' accumulated leaves that could occur based on the historical experience, judgments of the senior management, and other known reasons.

p. Share capital

- 1) The reconciliation of the Company's outstanding number of common stocks and its amounts at beginning and end of period is as follows:

Items	December 31, 2025	
	Number of Shares (Thousands)	Amount
Balance at January 1	99,099	\$990,990
Balance at December 31	<u>99,099</u>	<u>\$990,990</u>

Items	December 31, 2024	
	Number of Shares (Thousands)	Amount
Balance at January 1	99,099	\$990,990
Balance at December 31	<u>99,099</u>	<u>\$990,990</u>

- 2) As of December 31, 2025 and December 31, 2024, the Company had a nominal capital of NTD2,415,227 thousand, which is divided into 241,523 thousand shares (NTD10 per share). The paid-in capital averaged NTD990,990 thousand. The actual number of shares issued was 99,099 thousand shares on average.

q. Capital Surplus

Items	December 31, 2025	December 31, 2024
Treasury share transactions	\$251,850	\$235,776
Difference between the price received from acquisition or disposal of interest in subsidiaries and book value	2,113	2,113
Value of the acquired or disposed shares of subsidiaries		
Others (return of overdue unclaimed dividends)	2,378	2,110
Total	<u>\$256,341</u>	<u>\$239,999</u>

r. Retained earnings and dividend policy

The surplus distribution policy stipulated in the original articles of association stipulates that if there is profit in its general final account, the Company shall first pay all taxes and dues and cover accumulated losses, and then set aside 10% of such profits as a legal reserve. However, where such legal reserve amounts to the total amount of capital stock, this provision shall not apply. In addition, special surplus reserve shall be allocated or reversed in accordance with laws and regulations or regulations of the competent authority. If there is any surplus, the balance shall be added to the accumulated undistributed surplus. The Board of Directors shall prepare a distribution motion, to be submitted to the shareholders' meeting for resolution before issuance of new shares.

After the shareholders' meeting on June 5, 2020, it was revised as follows: The Company's surplus distribution or loss allowance can be made after the end of each semi-financial year, if there is any surplus in the semi-financial year's final accounts, the Company shall first pay all taxes and dues and cover accumulated losses, and then set aside 10% of such profits as a legal reserve. However, where such legal reserve amounts to the total amount of capital stock, this provision shall not apply. As stipulated by law or regulations or competent authority, the remaining balance shall then be appropriated for provisions or special reserve reversed. If there are still surplus and/or accumulated undistributed earnings, the Board of Directors shall submit an allocation proposal, and where new shares are issued, resolution at the shareholders' meeting shall be adopted before allocation.

Pursuant to Paragraph 5 of Article 240 of the Company Act, the company may authorize the distributable dividends and bonuses or in whole or in part legal reserve and capital reserve as provided in Paragraph 1 of Article 241 of the Company Act may be paid in cash after a resolution has been adopted by a majority vote at a meeting of the board of directors attended by two-thirds of the total number of directors; and in addition thereto a report of such distribution shall be submitted to the shareholders' meeting.

The Company has too diverse products to be divided by the stages of growth. With steady profitability and sound financial structure, the Company is able to distribute dividends and bonuses in cash at a ratio of 20% to 100% in principle. However, when there is any important investment, the company may reallocate all dividends and bonuses for a capital increase.

- 1) The statutory surplus reserve shall not be used except for the loss of the Company and the issuance of new shares or cash in proportion to the original share of the shareholders. However, if new shares or cash is issued, it shall be limited to the surplus exceeding 25% of the paid-in capital.
- 2) Special reserve
  - a) The Company may allocate earnings only after providing special reserve for debt balance under other equity on the balance sheet date, and the reversal of debit balance under other equity, if any, may be stated as distributable earnings.
  - b) As initial application of IFRSs, the special reserve set aside in accordance with the order issued by the FSC, the Company shall reverse the special reserve set aside proportionately as distributable retained earnings when the relevant assets are used, disposed of or reclassified subsequently.
- 3) The Company's resolutions on earnings distribution and dividends per share for the first half and second half of 2023 had been proposed by the Company's Board of Directors on August 11, 2023 and March 12, 2024, and they are as follows:

Items	Profit distribution plan		Dividends per Share (NTD)	
	First half of 2023	Second half of 2023	First half of 2023	Second half of 2023
Ordinary cash dividends	\$247,747	\$247,748	2.50	3.50

The distribution of cash dividends was reported to the shareholders' meeting on June 21, 2024; the reversal and appropriation of other earnings items were approved by electronic voting at the general meeting of shareholders before June 21, 2024.

- 4) The appropriations of earnings and dividends per share for the first half and second half of 2023 had been proposed by the Company's Board of Directors on August 12, 2024 and March 12, 2025, and they are as follows:

Items	Profit distribution plan		Dividends per Share (NTD)	
	First half of 2024	Second half of 2024	First half of 2024	Second half of 2024
Ordinary cash dividends	\$247,747	\$247,747	2.50	2.50

The distribution of cash dividends was reported to the shareholders' meeting on June 20, 2025; the reversal and appropriation of other earnings items were approved by electronic voting at the general meeting of shareholders before June 20, 2025.

- 5) The appropriations of earnings and dividends per share for the first half of 2024 had been proposed by the Company's Board of Directors on August 12, 2025, and they are as follows:

Items	Profit distribution plan	Dividends per Share (NTD)
	First half of 2025	First half of 2025
Ordinary cash dividends	\$198,198	2.00

- 6) The appropriations of earnings and dividends per share for the second half of 2025 had been proposed by the Company's Board of Directors on March 12, 2026, and they are as follows:

Items	Profit distribution plan	Dividends per Share (NTD)
	Second half of 2025	Second half of 2025
Ordinary cash dividends	\$247,747	2.50

- 7) Information on employee compensation resolved by the Board meetings is available on the "Market Observation Post System" of the Taiwan Stock Exchange Corporation.

			Number of shares at the end of the period
Tah Fa Investment Co., Ltd.	3,572	-	3,572

Investments in the Company's shares held by its subsidiaries are regarded as treasury stock, where these subsidiaries can still receive dividends from the Company but are not able to exercise their voting rights. As of December 31, 2025 and December 31, 2024, the Company's investment company, Tah Fa Investment Co., Ltd., held 3,572 thousand shares issued by the Company, with a total cost of NTD83,230 thousand. The investment company continued to hold its shares due to a stable share price, where its market price per share was NTD64,50 and NTD D69.90 as of December 31, 2025 and December 31, 2024, respectively.

u. Operating revenue

Items	December 31, 2025	December 31, 2024
Revenue from customer contracts		
Sales revenue	\$1,918,504	\$1,770,910
Less: Sales Return	(2,057)	(1,596)
Sales Allowances	(6,752)	(2,212)
(Net) Revenue from Contracts with Customers	<u>\$1,909,695</u>	<u>\$1,767,102</u>

1) Description of customer contract

The Company produces plastic products for the midstream and downstream of the plastics industry. Applied to daily supplies, the main products include rainwear, garments, PP corrugated boards, and binding machines, and laminators. In terms of export, materials of rainwear and garments are prepared in Taiwan for production overseas; in terms of domestic sales, rainwear and garments, including workwear, are sold by distributors. The Company's products are sold at fixed prices according to the contractual terms.

2) Customer contract revenue breakdown

The Company derives revenue from the transfer of goods and services over time and at a point in time in the following operating segments:

Product Category	December 31, 2025	December 31, 2024
Raincoat	\$1,000,537	\$840,196
Garment	427,720	412,688
Binding machine	140,441	151,465
PP corrugated board	212,323	213,842
Others	128,674	148,911
Total	<u>\$1,909,695</u>	<u>\$1,767,102</u>

Region	December 31, 2025	December 31, 2024
Taiwan	\$515,072	\$496,659
America	314,476	297,505
Europe	716,839	663,287
Japan	127,532	124,326
Others	235,776	185,325
Total	<u>\$1,909,695</u>	<u>\$1,767,102</u>

3) Contract balance

The Company's accounts receivable and contract liabilities relating to revenue from contracts with customers are as follows:

Items	December 31, 2025	December 31, 2024	December 31, 2022
Notes receivable and payments	\$369,173	\$415,553	\$290,678
Less: provision for losses	(12,020)	(12,502)	(8,572)
Total	<u>\$357,153</u>	<u>\$403,051</u>	<u>\$282,106</u>
Contract liabilities – current	<u>\$11,264</u>	<u>\$43,610</u>	<u>\$5,974</u>

a) Significant changes in contract assets and liabilities

The changes in contract assets and contract liabilities mainly arise from the difference between the time of fulfilling the obligations and the time of customer payment, and there are no other significant changes.

b) The amount of contract liabilities from the beginning of the year that are recognized in operating revenue in 2025 and 2024 were NTD42,475 thousand and NTD5,951 thousand respectively.

4) Unfulfilled customer contracts

The Company's unfulfilled contracts for the sale of goods or services as of December 31, 2025 and 2024 are expected to last for less than one year and are expected to be fulfilled and recognized as revenue in the next year.

The Company's salary and remuneration policies are as follows:

- a) The remuneration for Directors and Supervisors of the Company is divided into two categories: fixed monthly compensation and distribution in accordance with Article 27 of the Company's Articles of Association, as amended by the resolution of the shareholders' meeting on June 20, 2025: If the Company records an annual profit, the amount to cover accumulated losses shall be reserved in advance. If there is a remaining balance, no less than 0.5% of such balance shall be distributed as employee remuneration, whereas no more than 0.5% shall be distributed as directors' and supervisors' remuneration; additionally, no less than 0.5% shall be allocated for base-level employees' salary adjustments or remuneration distribution, the methods of which are authorized to be determined by the board of directors. The resolution on the remuneration of employees and directors and supervisors in the preceding paragraph shall be adopted by a special resolution of the board of directors and reported to the shareholders' meeting. If a director also serves as an employee, their remuneration shall be further paid in accordance with the provisions in (2) and (3) below.
  - b) For remuneration of General Manager and Deputy General Managers, in addition to fixed monthly salary in accordance to corporate standards, year-end bonus and festive bonuses are issued based on the operation of the Company. The remuneration of the General Manager and Deputy General Manager of the Company shall be paid in monthly fixed salary, and year-end bonus, festival bonus, etc. according to the Company's operating conditions. The salary structure and year-end bonus of the manager and the payment standard of year-end bonus shall be reviewed by the salary Committee and submitted to the Board of Directors for approval.
  - c) Employees' salaries are paid monthly at fixed rates in accordance with the Company's salary standards, and year-end bonuses, holiday bonuses, etc. are paid according to the Company's year-end bonus calculation methods and in accordance with Article 27 of the Company's Articles of Association, as amended by the resolution of the shareholders' meeting on June 20, 2025: If the Company has a profit during the distribution period, the amount to cover accumulated losses shall be reserved in advance. If there is a remaining balance, no less than 0.5% shall be distributed as employee remuneration, whereas no more than 0.5% shall be distributed as directors' and supervisors' remuneration; additionally, no less than 0.5% shall be allocated for base-level employees' salary adjustments or remuneration distribution, the methods of which are authorized to be determined by the board of directors. The resolution on the compensation of the employees and the remuneration of directors and supervisors in the preceding paragraph shall be approved and adopted by a special resolution of the board of directors and submitted to the shareholders' meeting.
- 2) Compensation to employees and remuneration to directors and supervisors for the years of 2025 and 2024 were resolved and approved by the Board of Directors on March 12, 2026 and March 12, 2025. Relevant amounts recognized in the financial statement are as follows:

	December 31, 2025			December 31, 2024	
	Employee Compensation	Remuneration for entry-level employees	Remuneration of directors	Employee Compensation	Remuneration of directors
Approved amount of distribution	\$850	\$850	\$780	\$1,280	\$1,140
Amounts recognized in the annual financial statements	850	850	780	1,280	1,140
Differences	-	-	-	-	-

- a) The employee remunerations listed above are all paid in cash.
  - b) If there are changes made to the amount after the annual financial statements are published, the changes shall be handled as changes in accounting estimates and recognized in the next year's financial statements.
- 3) For information on the Company's remunerations for employee and Directors as resolved by the Board of Directors, please visit the "Market Observation Post System" of Taiwan Stock Exchange.

w. Interest revenue

Items	December 31, 2025	December 31, 2024
Interest revenue		
Interest on bank deposits	\$61,192	\$72,007
Other interest income (overdue interest)	1	-
Interest income from financial assets measured at fair value through other comprehensive income	8,649	7,919
Total	\$69,842	\$79,926

x. Other income

Items	December 31, 2025	December 31, 2024
Rental income		
Investment properties		
Variable rent not depending to index or rate changes	\$26,885	\$18,264
Other operating leases		
Variable rent not depending to index or rate changes	6,487	34
Other rent	329	309
Total rental income	33,701	18,607
Dividend revenue	91,723	92,627
Other income	4,067	5,130
Total	\$129,491	\$116,364

y. Other profits and losses

Items	December 31, 2025	December 31, 2024
Gain (loss) on disposal of property, plant and equipment	\$25	(\$2,221)
Net foreign exchange gains (losses)	(43,891)	96,174
Financial assets at fair value through profit and loss	281	595
Gain (Loss) on disposal of investments	(5,941)	416
Miscellaneous expenses	(14,011)	(11,300)
Total	(\$63,537)	\$83,664

z. Financial costs

Items	December 31, 2025	December 31, 2024
Interest expense:		
Bank loans	\$49	\$25
Interest on lease liabilities	346	483
Subtotal	\$395	\$508
Less: Amount qualified for capitalization	-	-
Financial costs	\$395	\$508

aa. Income tax

1) Income tax expense

a) Income tax expense (benefit) components:

Items	December 31, 2025	December 31, 2024
<u>Current income tax</u>		
Income tax generated in the current period	\$24,217	\$22,558
Income tax overestimate/underestimate for previous years	404	20
Total income tax for the year	24,621	22,578
<u>Deferred income tax</u>		
Origination and reversal of temporary differences	(14,035)	11,208
Deferred income tax expenses	(14,035)	11,208
Income tax expense (gains)	\$10,586	\$33,786

b) Income tax expense (benefit) related to other comprehensive income:

Items	December 31, 2025	December 31, 2024
Exchange differences on translation of foreign operating organizations' financial statements	(\$3,032)	\$5,969
Total	(\$3,032)	\$5,969

2) The reconciliation of accounting income and income tax expense recognized in profit and loss for the current year is as follows:

Items	December 31, 2025	December 31, 2024
Net profit before taxes	\$158,318	\$239,355
Net profit before tax is calculated at the statutory tax rate	\$31,664	\$47,871
Effect of taxes on adjusted items:		
Effect of items not included when calculating taxable income		
Unpaid pensions	(733)	(745)
Loss (Gain) on investments accounted for using equity method	(3,523)	5,258
Tax-free income and stopped taxable income from securities transactions	(17,156)	(18,609)
Financial assets evaluation profit and loss	(56)	(119)
Unrealized exchange gains and losses	11,595	(11,088)
Loss on investments (realized)	(44,826)	(9,894)
Other adjustments	18,910	9,884
Loss carryforward	4,125	-
Income tax adjustment for the previous year	404	20
Income Tax Payable	24,217	9,365
Net change in deferred income tax	(14,035)	11,208
Income tax expense (gains) recognized in profit or loss	\$10,586	\$33,786

The tax rate applicable to the Company was 20% and, and the tax rate applicable to undistributed earnings is 5%.

In July of 2019, the President announced the amendment to the Statute for Industrial Innovation, which clearly stipulated that the undistributed earnings from 2018 onwards to build or purchase specific assets or technologies to reach a certain amount can be recognized as deduction items in the calculation of

undistributed earnings. The Company only deducted the capital expenses that has actually been invested when calculating the tax on unappropriated earnings.

- 3) Deferred income tax assets or liabilities from temporary difference, loss carry forwards and investment credits:

Items	December 31, 2025			
	Beginning balance	Recognized in profit (loss)	Recognized in other comprehensive income	Ending balance

Subtotal	20,300	(5,969)	14,331
Recognized in other comprehensive income	(\$935,382)	(\$5,969)	(\$941,351)

cc. Earnings Per Share

Items	December 31, 2025	December 31, 2024
A. Basic earnings per share:		
Net profit attributable to common shareholders of the parent company	\$147,732	\$205,569
Weighted average number of outstanding shares (thousand shares)	95,527	95,527
Basic earnings per share (after tax) (NTD)	\$1.55	\$2.15
B. Diluted earnings per share:		
Net profit attributable to common shareholders of the parent company	\$147,732	\$205,569
Weighted average number of outstanding shares	95,527	95,527
The effect of diluting potential common stocks:		
Number of employees' compensation impacts (note)	30	23
Calculate the weighted average number of outstanding shares of diluted earnings per share	95,557	95,550
Diluted earnings per share (after tax) (NTD)	\$1.55	\$2.15

(Note) If the Company chooses to offer employee compensation or share profits in the form of cash or stock, while calculating diluted earnings per share, and assuming that the compensation is paid in the form of stock, the dilutive potential common shares will be included in the weighted average number of outstanding shares to calculate diluted earnings per share. The dilutive effect of such potential common shares shall continue to be considered when calculating diluted earnings per share before the number of shares to be distributed as employee compensation is approved in the following year.

dd. Reconciliation of liabilities from fund-raising activities

Items	January 1, 2025	Cash flow	Non-cash Changes		December 31, 2025
			Fluctuation in exchange	Other Non-cash Changes

As of those dates, payments made under the contract amounted to NTD260,000 thousand and NTD88,571 thousand, respectively.  
As of December 31, 2025 and 2024, the Group had also signed a commissioned construction and urban renewal implementation agreement with Formosa Plastics Construction Corporation for the Formosa Taipei Building urban renewal project. The total commissioned construction fee was NTD595,271 thousand, and payments made under the agreement amounted to NTD89,291 thousand and NTD89,291 thousand, respectively.
- d. As of December 31, 2025 and 2024, For information on the Company's endorsements and guarantees for others, please refer to Note 7 (3) 13. and Note 13 (1)2.

**(X.) Significant Disaster Losses: None.**

**(XI.) Significant Events after the Balance Sheet Date: None.**

**(XII.) Others**

a. Capital Risk Management

The Company plans its needs for working capital and dividend payments in the future based on the characteristics of the industries to which its operations belong and future development of the company, and by taking into consideration changes in the external environment, to ensure that it can continue the operations, give back to shareholders, and protect the interests of stakeholders at the same time, as well as maintain the best capital structure to enhance shareholder value in the long run. To maintain an adjustable capital structure, the Company may adjust the amount of dividends paid to shareholders by issuing new shares, distributing cash to shareholders or buying back its shares.

The Company monitors its funds by regularly reviewing the asset-to-debt ratio.

b. Financial instruments

1) Financial risk of financial instruments

a) Financial risk management policies

The daily operations of the Company are affected by a number of financial risks, including market risk (exchange risk, interest rate risk, and other price risk), credit risk, and liquidity risk. To reduce related financial risks, the company is committed to identifying, assessing and avoiding market uncertainties, so as to reduce potentially unfavorable effects of market changes on its financial performance.

The Company's major financial activities are reviewed by its Board of Directors (and the Audit Committee) according to the relevant regulations and its internal control system. During the implementation of a financial plan, the Company must strictly comply with the financial procedures relating to overall financial risk management and segregation of duties.

b) The nature and degree of significant financial risks

i. Market risks

i) Exchange risks

The Company is exposed to exchange rate risks arising from sales, purchases and net investments in foreign operating entities that are not denominated in the functional currency of the Company. The company's functional currency is New Taiwan dollar. Such transactions are mainly denominated in U.S. dollars. The company's receivables and payables due in foreign currencies are denominated in the same currency. At this moment, natural hedges may arise in various sections. To avoid the decrease in the value of foreign currency assets and fluctuations in future cash flows due to changes in exchange rates, the company uses derivative instruments (including swap transactions) to hedge exchange rate risks. The use of such derivative instruments can assist the company in reducing the effects of changes in foreign exchange rates, but is still unable to fully eliminate such effects because the expiry dates are less than 12 months. The use of such derivative instruments can assist the company in reducing the effects of changes in foreign exchange rates, but is still unable to fully eliminate such effects.

Due to the fact that net investments in foreign operating entities are strategic investments, the company has not hedged these investments.

(a) The analysis of foreign exchange exposures and sensitivity is as follows:

Items	December 31, 2025			December 31, 2024		
	Foreign currency (in thousands)	Exchange rate currency (NTD)	Presented amount (New Taiwan Dollars)	Foreign currency (in thousands)	Exchange rate currency (NTD)	Presented amount (New Taiwan Dollars)
(Foreign currency: Functional currency)						
Financial assets						
Monetary items						
USD:NTD	\$40,079	31.380	\$1,257,681	\$45,251	32.735	\$1,481,277
JPY:NTD	145,276	0.1988	28,881	97,615	0.2079	20,294
Non-monetary items						
USD:NTD	20,874	31.380	655,022	20,785	32.735	680,392
JPY:NTD	514,422	0.1988	102,267	526,976	0.2079	109,558
Financial liabilities						
Monetary items						
USD:NTD	1,559	31.380	48,920	1,867	32.735	61,108

The sensitivity analysis of the Company's exchange rate risk is mainly performed to assess the effects of appreciation/depreciation of foreign currency monetary and non-monetary items on the company's profit or loss and equity at the end of the reporting period. The exchange rate risk of the Company is mainly affected by the fluctuation of the exchange rate of USD and JPY. When the appreciation/depreciation of USD and JPY is 5%, the after-tax net profit of the Company in 2025 and 2024 will increase/decrease by NTD49,506 thousand and NTD57,619 thousand respectively, and the equity will increase/decrease by NTD30,292 thousand and NTD31,598 thousand respectively.

(b) Due to the exchange rate volatility, total exchange gains and losses (including realized and unrealized) on the Company's monetary items amounted to (NTD43,891) thousand and NTD96,174 thousand as of December 31, 2025 and 2024, respectively.

ii) Other price risks

As the investment in equity instruments held by the Company in the parent company only balance sheets is classified as financial assets measured at fair value through other comprehensive income, the Company is exposed to the price risk of equity instruments. The Company mainly invests in stocks and beneficiary certificate of domestic listed and OTC companies. The price of these equity instruments will be affected by the certainty of the future value of the investment targets. If the price of equity instruments rises or falls by 5%, profit and loss after tax in 2025 and 2024 will increase or decrease by NTD907 thousand and NTD 893 thousand respectively due to the rise or decrease of financial assets measured at fair value through profits and losses. Other comprehensive profit and loss after tax in 2025 and 2024 will increase or decrease by NTD178,820 thousand and NTD 154,214 thousand respectively due to the rise or decrease of financial assets measured at fair value through other comprehensive profits and losses.

iii) Interest rate risk

The Group's exposure to interest rate risk primarily arises from its investment positions and financial liabilities. The carrying amounts of financial assets and financial liabilities exposed to interest rate risk as of the reporting date are as follows:

Items	Carrying amount	
	December 31, 2025	December 31, 2024
Interest rate risk with fair value		
Financial assets	\$187,615	\$158,571
Financial liabilities	-	-
Net Amount	\$187,615	\$158,571
Interest rate risk with cash flow		
Financial assets	\$2,276,771	\$2,096,404
Financial liabilities	-	-
Net amount	\$2,276,771	\$2,096,404

(a) Sensitivity analysis of interest rate risk with fair value instruments

The Company's fixed-rate financial assets expose the Group to fair value interest rate risk. A 1% increase or decrease in borrowing rates, assuming all other factors remain constant, would result in a decrease or increase of NTD1,876 thousand and NTD1,586 thousand, respectively, in the other comprehensive income for 2025 and 2024. This is primarily due to the classification of fixed-rate bond investments as financial assets measured at fair value through other comprehensive income, where changes in market interest rates result in corresponding changes in the fair value of bond investments.

The Company has yet to classify any fixed-rate financial assets and liabilities as measured at fair value through profit or loss. Besides, it has also yet to designate derivative instruments (interest rate swaps) as a hedging tool under the fair value hedge accounting model. Therefore, changes in interest rates on the reporting date will not affect profit or loss.

(b) Sensitivity analysis of interest rate risk with cash flow

The company's variable interest rate financial instruments belong to floating interest rate assets (liabilities). Therefore, changes in market interest rates will result in changes in effective interest rates, thereby causing fluctuations in future cash flows. Every 1 percent increase in the market interest rate would lead to an increase in net profit before tax, for 2025 and 2024 by NTD22,768 thousand and NTD20,964 thousand, respectively.

ii. Credit risk

Credit risk refers to the risk that a counterparty violates contractual obligations and causes financial loss to the company. The Company's credit risk comes mainly from accounts receivable arising from its operating activities, bank deposits arising from its investing activities, and other financial instruments. Operations-related credit risks and financial credit risks are managed separately.

i) Operation related credit risk

To maintain the quality of accounts receivable, the company has established procedures for the management of operations-related credit risks.

Factors that may affect customers' ability to pay, such as the financial status of a customer, the Company's internal credit rating, historical transaction records, and current economic conditions, are taken into account in the risk assessment of individual customers.

ii) Financial credit risk

The credit risks of bank deposits and other financial instruments are measured and monitored by the Company's financial department. The Company does not expect significant credit risk because the counterparties are creditworthy and investment-graded financial institutions, companies and government agencies without any significant default concerns. The management of credit risk of debt instruments is done through external agencies that assess credit ratings, credit quality of bonds, regional conditions, and counterparty risks to identify credit risk.

(a) The risk of credit concentration

As of December 31, 2025 and 2024, the top ten clients accounted for 81.54% and 82.90%, respectively, of the Company's accounts receivable. No significant credit concentration risk was shown from the remaining accounts receivables.

(b) Measurement of expected credit impairment losses

(1) Accounts receivable: A simplified approach is adopted, please refer to Note 6 (5) for more information.

(2) Basis for judging whether the credit risk increases significantly: The Company's investments in debt instruments measured at amortized cost or investments in debt instruments measured at FVTOCI have acquired a good valuation with low credit risk.

(3) The Company obtained collateral of NTD80,000 thousand from some customers to avoid the credit risks of some financial assets.

(c) The credit risk rating information of debt instrument investments measured at fair value through other comprehensive income (FVOCI) is as follows:

(1) Credit Risk Rating

Credit Rating	Definition	Basis for Recognition of Expected Credit Losses
Performing	The counterparty has a low credit risk and a strong capacity to meet contractual cash flows, and payments are less than 30 days past due.	12-month ECL
Underperforming	Payments are more than 30 days past due, or there has been a significant increase in credit risk since initial recognition.	Lifetime ECL (not credit-impaired)
In Default	There is evidence indicating that the debtor faces severe financial difficulty and the Payments are more than 90 days past due, or there is objective evidence that the asset is credit-impaired.	Lifetime ECL (credit-impaired)

Credit Rating	Definition	Basis for Recognition of Expected Credit Losses
Write-off	There is evidence indicating that the debtor faces severe financial difficulty and the Group has no reasonable expectation of recovery (e.g., payments are more than 365 days past due).	Direct write-off

(2) The gross carrying amount and the applicable expected credit loss rates of debt instrument investments, categorized by credit risk rating grades, are as follows:  
December 31, 2025

Credit Rating	Expected Credit Loss Rate	Gross Carrying Amount	
		At fair value through other comprehensive income	At amortized cost
Performing	0%~1%	\$187,615	-
Underperforming	3%	-	-
In Default	20%~50%	-	-
Write-off	100%	-	-

December 31, 2024

Credit Rating	Expected Credit Loss Rate	Gross Carrying Amount	
		At fair value through other comprehensive income	At amortized cost
Performing	0%~1%	\$158,571	-
Underperforming	3%	-	-
In Default	20%~50%	-	-
Write-off	100%	-	-

iii. Liquidity risk

i) Liquidity risk management:

The objective of the company's liquidity risk management is to maintain cash and cash equivalents, highly liquid securities and sufficient bank facilities required for its operations, so as to ensure that the company possesses adequate financial flexibility.

ii) Analysis of maturity of financial liabilities:

The following table shows the analysis of the company's financial liabilities based on the maturity and undiscounted due amount of these financial liabilities within the agreed repayment periods, as for the leasing expiry dates, please refer to Note 6 (10) 2:

Non-derivative financial liabilities	December 31, 2025					Contractual cash flows	Carrying amount
	less than 6 months	7-12 months	1-2 year(s)	2-5 years	More than 5 years		
Accounts payable (including related parties)	\$68,991	-	-	-	-	\$68,991	\$68,991
Trade payables (including related parties)	27,120	-	-	-	-	27,120	27,120

Guarantee received	deposits	-	\$760	-	\$1,950	-	2,710	2,710
Total		\$231,382	\$760	-	\$1,950	-	\$234,092	\$234,092

1

The Company does not expect a significant difference in the cash flows timing or the actual amount from the maturity analysis.

2) Types of financial instruments

The book value of various financial assets and financial liabilities of the Company as at December 31, 2025 and 2024 are as follows:

	December 31, 2025	December 31, 2024
<u>Financial assets</u>		
Financial assets at amortized cost		
Cash and cash equivalents	\$2,140,775	\$1,866,059
Notes and accounts receivable (including related parties)	357,153	403,051
Other receivables (including related parties)	17,358	13,545
Other financial assets - current	150,000	250,000
Refundable deposits	1,988	1,988
Financial assets measured at fair value through profit and loss - current	18,141	17,860
Financial assets at fair value through other comprehensive income - current	3,152,776	2,712,936
Financial assets at fair value through other comprehensive income - non-current	423,617	371,339
<u>Financial liabilities</u>		
Financial liabilities measured at amortized cost		
Notes and accounts payable (including related parties)	96,111	153,065
Other payables (including related parties)	80,446	78,317
Guarantee deposits received	5,926	2,710

c. Information on fair value:

- 1) Please refer to Note 12 (3)2. for the information on fair value of financial assets and financial liabilities of the Company not measured at fair value. Please refer to Note 6 (10) for information on the fair value of financial assets and investments in real estate measured at cost of the Company.

2) Definition of fair value hierarchy

Level 1:

Level 1 inputs are quoted prices in active markets for identical assets or liabilities. An active market is a market that meets all of the conditions set below: the items traded in the market are homogeneous, willing buyers and sellers can normally be found at any time and prices are available to the public. The Company invests in listed and OTC stocks, beneficiary certificates, investments in on-the-run Taiwan's government bonds, and derivative instruments with quoted prices in active markets are all included.

Level 2:

Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (e.g., price) or indirectly (e.g., derived from price) from the active markets. The fair value of the company's investments in off-the-run government bonds, corporate bonds, financial bonds, convertible corporate bonds, and most derivative instruments belong to this level.

Level 3:

Level 3 inputs refer to inputs that measure fair value to the extent that relevant observable inputs are not available in the market. Some of the Company's investments in derivative instruments and equity instruments without active market.

3) Financial instruments not measured by fair value:

The Company's financial instruments not measured at fair value, such as cash and cash equivalents, notes and amounts receivable, other financial assets, deposits, notes and amounts payable, and the carrying value of guarantee deposits, are reasonable approximations to their fair values.

4) Fair value hierarchy

The financial instruments measured at fair value by the Company is on a recurring basis, and the information on the fair value hierarchy of the Company is as follows:

Items	December 31, 2025			Total
	Level 1	Level 2	Level 3	
Assets				
<u>Recurring fair value</u>				
Financial assets at fair value through profit and loss				
Beneficiary certificate	\$18,141	-	-	\$18,141
Financial assets at fair value through other comprehensive income				
Equity securities	3,152,776	-	\$236,002	3,388,778
Corporate bonds	-	\$187,615	-	187,615
Total	<u>\$3,170,917</u>	<u>\$187,615</u>	<u>\$236,002</u>	<u>\$3,594,534</u>

Items	December 31, 2024			Total
	Level 1	Level 2	Level 3	
Assets				
<u>Recurring fair value</u>				
Financial assets measured at fair value through profit and loss				
Beneficiary certificate	\$17,860	-	-	\$17,860
Financial assets measured at fair value through other comprehensive income				
Equity securities	2,712,936	-	\$212,768	2,925,704
Corporate bonds	-	\$158,571	-	158,571
Total	<u>\$2,730,796</u>	<u>\$158,571</u>	<u>\$212,768</u>	<u>\$3,102,135</u>

- 5) Fair value valuation technique for instruments measured at fair value:
- If a financial instrument has a quoted price in an active market, the quoted price will be adopted as the fair value.  
The categories and characteristics of fair value measurement for the financial instruments with active markets held by the Company were as follows:
    - Listed company stocks: closing prices.
    - Open-end funds: net worth.
  - The fair value of stocks of unlisted (OTC) companies without an active market held by the Company is mainly estimated by the market method, and the judgment is made with reference to the evaluation of similar companies, third-party quotations, company net worth and operating conditions.
  - When evaluating non-standardized and less complex financial instruments, such as debt instruments, interest rate swaps, foreign exchange contracts and options in illiquid markets, the Company uses valuation techniques widely used by market participants. The parameters used in the valuation model of such financial instruments are usually from observable market information.
  - Valuation of derivative financial instruments adopts valuation models that are commonly used by market participants, such as discounted cash flows method and option pricing model. Forward foreign exchange contracts are usually valued based on the current forward exchange rates.
  - The output of the valuation model is the estimated value, and the valuation methods may not reflect all relevant factors of the financial and non-financial instruments held by the Company. Therefore, the estimated value of the valuation model will be adjusted according to additional parameters, such as model risk or liquidity risk. According to the Company's fair value valuation model management policy and related control procedures, the management believes that it is appropriate and necessary to make appropriate adjustments to express the fair value of financial and non-financial instruments in the individual balance sheet. The price information and parameters used in the valuation process are carefully evaluated and properly adjusted according to the current market situation.
  - The Company takes into account adjustments for credit risks to measure the fair value of financial and non-financial instruments to reflect credit risk of the counterparty and the Company's credit quality.
- 6) Transfers between Level 1 and Level 2 fair value hierarchy: None.
- 7) Statement of changes in Level 3 fair value hierarchy:

Items	Equity securities	
	December 31, 2025	December 31, 2024
Beginning balance	\$212,768	\$342,816
Recognized in other comprehensive income	20,365	(130,048)
Acquisition in the current period	5,737	-
Disposal in the current period	-	-
Transfer into Level 3	-	-
Transfer out of Level 3	(2,868)	-
Ending balance	\$236,002	\$212,768

- 8) Quantitative information about the significant unobservable inputs (Level 3) used in the fair value measurement:

	Fair value as of December 31, 2025	Valuation Technique	Material Unobservable Inputs	Percentage	Relationship of inputs to fair value
Non-derivative equity instruments:					
Investment in shares of companies	\$231,700	Net asset value method	Not applicable	Not applicable	Not applicable
Non-listed company stocks	4,302	Market approach	Lack of market liquidity discount	20%	The higher the lack of market liquidity discount, the lower the fair value

	Fair value as of December 31, 2024	Valuation Technique	Material Unobservable Inputs	Percentage	Relationship of inputs to fair value
Non-derivative equity instruments:					
Investment in shares of companies	\$209,900	Net asset value method	Not applicable	Not applicable	Not applicable
Non-listed company stocks	2,868	Market approach	Lack of market liquidity discount	20%	The higher the lack of market liquidity discount, the lower the fair value

9) Valuation process for Level 3 fair value measurement:

The valuation process regarding Level 3 fair value is conducted by the Company's finance department, which is responsible for the independent fair value verification of financial instruments, using independent data sources to make the valuation results close to market conditions and confirming that the data sources are independent, reliable, consistent with other resources and representative of executable prices. Additionally, the finance department regularly calibrates valuation models, performs back-testing, updates inputs and data required for the models and makes any other necessary fair value adjustments so as to ensure the reasonableness of the valuation results.

- d. Transfer of financial assets: None.  
e. Offsetting financial assets and financial liabilities: None.

**(XIII.) Additional Disclosures**

1. Information on significant transactions
  - 1) Loaning to Others: None.
  - 2) Endorsements/Guarantees Provided for Others: Table 1.
  - 3) Significant securities Held at End of Period (Excluding Investments in Subsidiaries, Associates, and Joint Ventures): Table 2.
  - 4) Purchases or Sales with Related Parties Amounting to NTD100 Million or More than 20% of Paid-in Capital: None.
  - 5) Receivables From Related Parties Amounting to NTD100 Million or More Than 20% of Paid-in Capital: None.
2. Information on Investee Companies: Table 3.
3. Information on investments in mainland China
  - 1) Information on any investee company in mainland China (name, main business, paid-in capital, method of investment, inward and outward remittance of funds, ownership percentage, investment income, carrying amount of investment at end of period, repatriations of investment income, and limit on the amount of investment in mainland China): Table 4.
  - 2) Significant transactions with Hong Kong Tai Ho Co., Ltd. for reinvestment in DAFU Plastic Industry Co., Ltd.:
    - a) Amount of sales and balance of the account payables at the end of the period: The purchase amount is NTD57,722 thousand and account payable at the end of the period is NTD650 thousand.
    - b) Amount of sales and balance of the receivables at the end of the period: Sales amount is NTD523 thousand.
    - c) The amount of property transactions and the amount of the gains or losses: none
    - d) Bill endorsement, guarantee or provision of collateral: none
    - e) Financial accommodation: none
    - f) In 2025, product processing fees of NTD12,719 thousand by DAFU Plastic Industry Co., Ltd. through Tai Ho Co., Ltd. Other payables (include purchasing of raw materials) at the end of the period were NTD693 thousand.
    - g) The Company (hereafter referred to as the Principal) entrusts Hong Kong Tai Ho Co., Ltd.(hereafter referred to as the Agent) to invest in DAFU Plastic Industry Co., Ltd. in Putian, China, and both parties agree to abide by the following terms and conditions:
      - i. The client appointed the trustee to invest in mainland China to establish Fujian Putian Dafu Plastic Industry Co., Ltd. with a total amount of USD8,100,000.
      - ii. The Agent shall apply to the Chinese competent authority for investment and capital increase in DAFU Plastic Industry Co., Ltd. in the Agent's name. The fund is to be remitted to the Mainland Area from Hong Kong by the Agent.
      - iii. Should Fujian Putian DAFU Plastic Industry Co., Ltd. has any income or interest distribution, the trustee shall first receive the interest and then remit it to it to the client.

- iv. If DAFU Plastic Industry Co., Ltd. is required to return the investment fund due to capital reduction, cessation of operation or other reasons, the Agent shall firstly obtain the said amount and then transfer the amount in full to the Principal.
- v. If the Agent is required to transfer the investment fund, dividends, or profits due to the reasons listed in the preceding two paragraphs, the Agent shall notify the Principal and the payment shall be made in the way specified by the Principal.
- vi. Based on the entrusted investment relationship, the rights and obligations of the trustee to Fujian Putian DAFU Plastic Industry Co., Ltd. are transferred to the client, and the trustee does not guarantee its profits and losses.
- vii. The Agent shall exercise due care of a prudent administrator in discretionary investment, capital increase, exchange settlement, and receipt of dividends.
- viii. The Agent shall send the financial statements of DAFU Plastic Industry Co., Ltd. to the Principal regularly, and the Principal may entrust certified public accountant or other audit personnel to audit the financial statements.
- ix. Matters not stipulated in this power of attorney shall be handled in accordance with relevant laws and regulations of the Republic of China on domestic and foreign financial practices, etc.
- h) The Company increased investment in Hong Kong Tai Ho Co., Ltd. by HKD10,075,000 (equivalent to USD1,300,000), which was then to be re-invested in DAFU Plastic Industry Co., Ltd.
